Academic Program and Course Description Guide

2024

Introduction:

The educational program is a well-planned set of courses that include procedures and experiences arranged in the form of an academic syllabus. Its main goal is to improve and build graduates' skills so they are ready for the job market. The program is reviewed and evaluated every year through internal or external audit procedures and programs like the External Examiner Program.

The academic program description is a short summary of the main features of the program and its courses. It shows what skills students are working to develop based on the program's goals. This description is very important because it is the main part of getting the program accredited, and it is written by the teaching staff together under the supervision of scientific committees in the scientific departments.

This guide, in its second version, includes a description of the academic program after updating the subjects and paragraphs of the previous guide in light of the updates and developments of the educational system in Iraq, which included the description of the academic program in its traditional form (annual, quarterly), as well as the adoption of the academic program description circulated according to the letter of the Department of Studies T 3/2906 on 3/5/2023 regarding the programs that adopt the Bologna Process as the basis for their work.

In this regard, we can only emphasize the importance of writing an academic programs and course description to ensure the proper functioning of the educational process.

Concepts and terminology:

Academic Program Description: The academic program description provides a brief summary of its vision, mission and objectives, including an accurate description of the targeted learning outcomes according to specific learning strategies.

Course Description: Provides a brief summary of the most important characteristics of the course and the learning outcomes expected of the students to achieve, proving whether they have made the most of the available learning opportunities. It is derived from the program description.

Program Vision: An ambitious picture for the future of the academic program to be sophisticated, inspiring, stimulating, realistic and applicable.

Program Mission: Briefly outlines the objectives and activities necessary to achieve them and defines the program's development paths and directions.

Program Objectives: They are statements that describe what the academic program intends to achieve within a specific period of time and are measurable and observable.

Curriculum Structure: All courses / subjects included in the academic program according to the approved learning system (quarterly, annual, Bologna Process) whether it is a requirement (ministry, university, college and scientific department) with the number of credit hours.

Learning Outcomes: A compatible set of knowledge, skills and values acquired by students after the successful completion of the academic program and must determine the learning outcomes of each course in a way that achieves the objectives of the program.

Teaching and learning strategies: They are the strategies used by the faculty members to develop students' teaching and learning, and they are plans that are followed to reach the learning goals. They describe all classroom and extra-curricular activities to achieve the learning outcomes of the program.

1. Program Vision

The Department of Soil Sciences and Water Resources seeks to be one of the departments of advanced agricultural colleges in graduating competent agricultural engineers in the field of soil sciences and water resources to place them in the labor market and contribute to raising plant production by increasing soil fertility and improving its various qualities.

2. Program Mission

Leadership and excellence as a professional university that works to qualify and graduate national human resources with a high degree of competence for the labor market in the region. And to be a major source of applied scientific research that supports economic development and effective participation in social welfare.

3. Program Objectives

The program aims to prepare cadres of agricultural engineers specialized in the five soil sciences: soil chemistry, soil physics, soil biology, soil fertility, soil surveying and classification, and employ them in work in the local market and all state departments.

4. Program Accreditation

The department is working to obtain program accreditation by applying the standards launched by the Ministry

5. Other external influences

Field visits to stations and relevant state institutions

6. Program Structure

Program Structure	Number of Courses	Credit hours	Percentage	Notes*
Institution Requirements	15	29	15.38	Basic
College Requirements	19	62.5	33.15	Basic
Department Requirements	30	97	51.45	Basic

Summer Training	1			Basic
Other				
The total	65	188.5		

* This can include notes whether the course is basic or optional.

7. Program Description			
Year/Level	Course Code	Course Name	Credit Hours
First/ first semester	OC13101	Analytical chemistry	30 theoretical + 45 practical
	OC13102	General physics	30 theoretical + 45 practical
	U013101	Mathematics 1	30 theoretical
	OC13103	Engineering Drawing	45 practical
	U013102	Democracy and human rights	30 theoretical
	OC13104	Principles of animal prod.	30 theoretical + 45 practical
	OC13105	Principles of field crops	30 theoretical + 45 practical
	U013103	Computer 1	30 practical
First/ second semester	0023101	Geology	30 theoretical + 45 practical
	OC23101	Organic chemistry	30 theoretical + 45 practical
	OC23102	Principles of fruit production	30 theoretical + 45 practical
	OC23103	Space and leveling	30 theoretical + 45 practical
	U023101	Computer 2	30 practical
	U023102	English language	30 theoretical
	OC23104	Agriculture economy	30 theoretical + 45 practical
	U023103	Mathematics 2	30 theoretical
	U023104	Arabic language	30 theoretical
Second/ first semester	U023105	Crimes of Ba'ath Party	30 theoretical
	OC13201	Biochemistry	30 theoretical + 45 practical
	0013201	Principles of soil science	30 theoretical + 45 practical
	OC13202	Principles of statistics	30 theoretical + 45 practical
	0013202	Microbiology	30 theoretical + 45 practical
	OC13203	Vegetables production	30 theoretical + 45 practical
	U013201	Computer 3	30 practical
Second/ second semester	OC13204	Agricultural machin.& equip.	30 theoretical + 45 practical
	0023201	Soil, water, and plant analysis	30 theoretical + 45 practical
	OC23201	Basics of plant protection	30 theoretical + 45 practical
	0023202	Soil environment&Atmospher.	30 theoretical + 45 practical
	OC23202	Principles of agri. extension	30 theoretical
	0023203	Land settlement & adjustment	30 theoretical + 45 practical
	OC23203	Plant Physiology	30 theoretical + 45 practical
	U023201	English language	30 theoretical
Third/ first semester	U023202	Computer 4	30 practical
	0013301	Soil physics	30 theoretical + 45 practical
	0013302	Soil chemistry	30 theoretical + 45 practical
	0013303	Soil fertility	30 theoretical + 45 practical
	0013304	Irrigation	30 theoretical + 45 practical

	0013305 0C13301 0013306 U013301	Soil morphology Experi. Design and analysis Soil and water pollution English language	30 theoretical + 45 practical 30 theoretical + 45 practical 30 theoretical + 45 practical 30 theoretical
Third/ second semester	0C23301 0023301 0023302 0C23302 0023303 0023304	Economics of natural resourc. Drainage Soil mineralogy Remote Sensing Soil salinity Organic soil matter	30 theoretical 30 theoretical + 45 practical 30 theoretical + 45 practical 30 theoretical + 45 practical 30 theoretical + 45 practical 30 theoretical + 45 practical

8. Expected learning outcomes of the program

Knowledge	
Cognitive goals	Student learns about the concept of soil and its geological components. The student learns about the types of soil and the external influences that contributed to the formation of soil. The student learns about the nutrients found in the soil.
Skills	
Skills objectives of the program	Thinking skill Scientific research skills Teaching skills
Ethics	
Evaluation	Theoretical tests Practical tests Weekly reports

9. Teaching and Learning Strategies

- 1- Explanation and clarification
- 2- Lecture method
- 3- Practical lessons in the lab.
- 4- Scientific trips to relevant departments and research stations and Self-learning method

10. Evaluation methods

- 1-Theoretical tests
- 2- Practical tests
- 3- Reports and studies

11.Faculty

Faculty Members

Academic Rank	Specialization		Special Requirements/Skills (if applicable)		Number of the teaching staff	
	General	Special			Staff	Lecturer
Professor	Soil and water resources	Soil microbiology			٢	
Professor	Soil and water resources	Soil fertility and fertilization			٢	
Professor	Gardening	vegetable production			١	
Assistant Professor	Soil and water resources	Soil survey and classification			١	
Assistant Professor	agricultural economy	agricultural economy			١	
Assistant Professor	Plant/soil production	Soil chemistry			١	
Assistant Professor	Machine engineering	Agricultural machines			١	
Assistant Professor	Gardening	His saddle is green			١	
Lecturer	Soil and water resources	Soil fertility and fertilization			١	
Lecturer	Gardening	Heredity			١	

Lecturer	Vegetable production	Soil fertility			✓	
assistant lecturer	Vegetable production	Soil physics			✓	
assistant lecturer	Vegetable production	Soil microbiology			✓	

Professional Development

Mentoring new faculty members

Guiding new, visiting, full-time and part-time faculty members by following them up by the Scientific Committee and the Department Head, attending lectures, and giving them the necessary directions.

Professional development of faculty members

- 1- Follow teaching and learning strategies
- 2- Evaluation of learning outcomes by the scientific committee
- 3- Professional development through holding development courses

12.Acceptance Criterion

Central admission

13.The most important sources of information about the program

- 1- The website of the college and university
- 2- University guide
- 3- Central Library
- 4- The most important books and sources for the department
- 5- The Internet

14.Program Development Plan

- 1-Teamwork: Working within the group effectively and actively.
- 2- Time management: Managing time effectively and setting priorities with the ability to work organized by appointments.
- 3- Leadership: The ability to direct and motivate others.
- 4- Independence at work.
- 5- Negotiation and persuasion (the student is able to influence and persuade others to discuss and reach an agreement.
- 6- Global skills (the student is able to speak and understand other languages and appreciate other cultures.

Program Skills Outline															
				Required program Learning outcomes											
Year/Level	Course Code	Course Name	Basic or optional	Knowledge				Skills				Ethics			
				A1	A2	A3	A4	B1	B2	B3	B4	C1	C2	C3	C4
First/ first semester		Computer basics	Basic	•	•	•	•	•	•	•	•	•	•	•	•
		Mathematics 1	Basic		•		•								
		Human rights and concepts of freedom	Basic					•				•		•	
		Principles of animal production	Basic						•

		Principles of agricultural economics	Basic		•			•		•			•		
		organic chemistry	Basic		•	•					•				

		Principles of geology	Basic												
Second/ first semester		The crimes of the Baath regime in Iraq	Basic												
		English language 2	Basic												
		Computer applications	Basic												
		Principles of microbiology	Basic												
		Biochemistry	Basic												
		Environment and weather conditions	Basic												
		Green production	Basic												
		Principles of statistics	Basic												

		Principles of soil science	Basic												
Second/ second semester		Computer applications 4	Basic												
		Phosphorus is a plant	Basic												
		Agricultural machines and machinery	Basic												
		Concepts of freedom and democracy	Basic												
		Principles of agricultural extension	Basic												
		Soil, water and plant analysis	Basic												
		Land settlement and modification	Basic												

		Principles of plant protection	Basic												
Third/ first semester		English language 3	Basic												
		Design and analysis of experiments	Basic												
		Soil, water and plant pollution	Basic												
		Organic matter in the soil	Basic												
		Soil fertility	Basic												
		Soil chemistry	Basic												
		Soil physics	Basic												
		irrigation	Basic												

Third/ second semester		Natural resource economics	Basic												
		Drainage	Basic												
		Soil minerals	Basic												
		Soil salinity	Basic												
		Remote sensation	Basic												
		Soil morphology	Basic												
Fourth/ first semester		Graduation research project	Basic												
		English language 4	Basic												
		Relationship between soil, water and plants	Basic												
		Irrigation systems technologies	Basic												

		Hydrology and water resources	Basic												
		Soil survey and classification	Basic												
		Soil and water maintenance	Basic												
		Soil microbiology	Basic												
Fourth/ second semester		Graduation research project	Basic												
		Seminars	Basic												
		Desertification	Basic												
		Fertilizer technologies	Basic												
		Plant nutrition	Basic												
		Soil management	Basic												

		Land reclamation	Basic												

- Please tick the boxes corresponding to the individual program learning outcomes under evaluation.

Course Description Form

1. Course Name:	
Analytical Chemistry	
2. Course Code:	
OC13101	
3. Semester / Year:	
First Semester / First Year	
4. Description Preparation Date:	
28/2/2024	
5. Available Attendance Forms:	
Actual attendance	
6. Number of Credit Hours (Total) / Number of Units (Total)	
2 theoretical / 2 practical / units 3	
7. Course administrator's name (mention all, if more than one name)	
Name: Lecturer. Anmar Hamoudi Kadhim Email: anmarjhayl@mu.edu.iq	
8. Course Objectives	
Course Objectives	1- Introducing students to the concept of analytical chemistry, as it is one of the branches of chemistry, and what is its importance and types. 2- Identify the methods of chemical analysis and the difference between one method and another. 3- Learn how to conduct multiple methods of chemical analysis and what is the best way to obtain results. 4- Learn about methods of calculation and data analysis to obtain results. 5- Learn how to interpret the results and give the correct recommendations.
9. Teaching and Learning Strategies	
Strategy	1. Explain and clarify the concept of analytical chemistry. 2. Explain the types of chemical analyzes and the differences between them. 3. Learn about the use of chemical and mechanical methods and the use of devices to conduct analytical tests. 4. Identify the characteristics of chemicals, their degree of danger, how to deal with them, and calculation methods. 5. Learn about computational methods to obtain chemical analysis results. 6. Interpretation of results.

10. Course Structure					
Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
1 st	4	Definition of analytical chemistry and its importance	Analytical Chemistry	Explanation and presentation Model and lecture	Examination
2 nd	4	Classification of analytical chemistry	Analytical Chemistry	Explanation and presentation Model and lecture	Examination
3 rd	4	Types of analytical chemistry	Analytical Chemistry	Explanation and presentation Model and lecture	Examination
4 th	4	Analysis accounts Volumetric	Analytical Chemistry	Explanation and presentation Model and lecture	Examination
5 th	4	Types of calibrations used in volumetric analysis	Analytical Chemistry	Explanation and presentation Model and lecture	Examination
6 th	4	Learn about the concept of equivalence evidence and its theories	Analytical Chemistry	Explanation and presentation Model and lecture	Examination
7 th	4	Principles of gravimetric analysis and its requirements	Analytical Chemistry	Explanation and presentation Model and lecture	Examination
8 th	4	Gravimetric analysis methods	Analytical Chemistry	Explanation and presentation Model and lecture	Examination
9 th	4	Methods of deposition and isolation of materials	Analytical Chemistry	Explanation and presentation Model and lecture	Examination
10 th	4	Sediment contamination of materials and processing methods	Analytical Chemistry	Explanation and presentation Model and lecture	Examination
11 th	4	Basic principles of spectroscopy	Analytical Chemistry	Explanation and presentation Model and lecture	Examination

12 th	4	Spectral analysis devices and how to use them	Analytical Chemistry	Explanation and presentation Model and lecture	Examination
13 th	4	Analysis using atomic absorption and emission	Analytical Chemistry	Explanation and presentation Model and lecture	Examination
14 th	4	Atomic absorption devices, their types and methods of use	Analytical Chemistry	Explanation and presentation Model and lecture	Examination
15 th	4	Practical application on spectroscopic and atomic analysis devices	Analytical Chemistry	Explanation and presentation Model and lecture	Examination
11.Course Evaluation					
1-Theoretical tests 25 2- Practical tests 15 3- Reports and studies 10 4- Final exam 50					
12.Learning and Teaching Resources					
Required textbooks (curricular books, if any)			Foundations of analytical chemistry. Dr. Thabet Saeed Al-Ghabsha and Dr. Moyed Qasim Al-Abaji. Ministry of Higher Education and Scientific Research. University of Al Mosul.		
Main references (sources)					
Recommended books and references (scientific journals, reports...)			Iraqi academic scientific journals		
Electronic References, Websites			https://learnchemistry12.com/2018/07/analytical-magdbook.html		

Course Description Form

13.Course Name:
General physics
14.Course Code:
0C13102
15.Semester / Year:
One/First
16.Description Preparation Date:
26\2\2024

Actual presence

18.Number of Credit Hours (Total) / Number of Units (Total)					
2 theoretical		3 practical		units 3.5	
19. Course administrator's name (mention all, if more than one name)					
Name: Dr. Mohanad .T .Muften Email: mohanadturki@mu.edu.iq					
20.Course Objectives					
Course Objectiv	<ul style="list-style-type: none">• General physics studies natural states of matter, general properties of matter and mechanical properties For the material.• It includes introducing the student to the assumptions of kinetic theory, molecular dimensions and interfacial distances. Brownian motion• Students learned about Boyle’s law, compressibility and elasticity• The student learns about water: its molecular structure, its hydrogen bonding, and its properties as a solvent.• Study the concept of viscosity, Newton’s law of viscosity• Identify optical devices, X-rays.				
21.Teaching and Learning Strategies					
Strategy	1-Explanation and clarification 2- Lecture method 3- Student groups 4- Practical lessons 5- Scientific trips 6 - Self-learning method				
22. Course Structure					
Week	H ou rs	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
First	5	The student gets to know the states of natural matter, the general properties of matter, and the mechanical properties of matter	General physics	Explanation, presentation of model and lecture	the exam
the second	5	The student will be familiar with the assumptions of kinetic theory, molecular dimensions and interspace distances, and Brownian motion	General physics	Explanation, presentation of model and lecture	the exam
the third	5	The student gets to know molecular speeds, molecular forces, collisions between molecules, and their properties of matter	General physics	Explanation, presentation of model and lecture	the exam

the fourth	5	The student gets to know Boyle's Law: compressibility and elasticity	General physics	Explanation, presentation of model and lecture	the exam
Fifth	5	The student gets to know mechanics: laws of force and motion, the laws of motion in one dimension, and the free fall of bodies	General physics	Explanation, presentation of model and lecture	the exam
Sixth	5	The student gets to know Newton's laws of motion: the first law of motion, the second law of motion, Newton's law of universal gravitation	General physics	Explanation, presentation of model and lecture	the exam
Seventh	5	The student gets to know water: molecular structure, its hydrogen bonding, and its properties as a solvent	General physics	Explanation, presentation of model and lecture	the exam
Eighth	5	The student gets to know surface tension, contact angle, and capillary property	General physics	Explanation, presentation of model and lecture	the exam
Ninth	5	The student will learn about diffusion and the osmotic phenomenon	General physics	Explanation, presentation of model and lecture	the exam
The tenth	5	The student will learn about viscosity: Newton's law of viscosity	General physics	Explanation, presentation of model and lecture	the exam
Eleventh	5	The student gets to know the flow of fluids and fluid pressure	General physics	Explanation, presentation of model and lecture	the exam
Twelfth	5	The student will be familiar with volume and weight relationships, density of objects, and porosity	General physics	Explanation, presentation of model and lecture	the exam
Thirteenth	5	Surface area and quality	General physics	Explanation, presentation of model and lecture	the exam
fourteenth	5	For the student to become familiar with optical devices	General physics	Explanation, presentation of model and lecture	the exam
Fifteenth	5	X ray	General physics	Explanation, presentation of model and lecture	the exam

23.Course Evaluation

1-Theoretical tests	25
2- Practical tests	15
3- Reports and studies	10
4- Final exam	50

24.Learning and Teaching Resources

Required textbooks (curriculum books, if any)	Daniel Schaum: A series of Schaum's summaries of theories and problems in university physics
Main references (sources)	1- Principles of general physics _ Dr. Aqeel Mahdi Kazem 2- Dr. Rahim Abdelkatal: University Physics, Part 1, Mechanics and Properties of Matter, Wave Motion, and Heat

Recommended books and references (scientific journals, reports...)	Iraqi academic scientific journals
Electronic Websites	Internet Physics Pdf Book

43. Course administrator's name (mention all, if more than one name)					
Name: Assistant Professor Dr. Ahmed Merza Abood Email : ahmedme@mu.edu.iq					
44.Course Objectives					
Course Objectiv	1- Teaching students, the basic concepts related to access to the simple basics of an of engineer drawing for students of the College of Agriculture. 2- Development the ability of preparing engineering designs for agricultural projects, 3- Student be able to read various engineering drawings and implement them in Reality.				
45.Teaching and Learning Strategies					
Strategy	1-Explanation and clarification 2- Lecture method 3- Student groups 4- Practical lessons 5- Scientific trips 6 - Self-learning method				
46. Course Structure					
Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluati on method
First	2	The student gets to know the tools of engineering drawing and its uses.	1	Explanation, presentation of model and lecture	the exam, Quizzes, Reports, and

					activities in class
the second	2	The student gets to know types of lines and dimensions	2	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and activities in class
the third	2	The student gets to know the curves.	3	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and activities in class
the fourth	2	Student able to recognize the ellipse	4	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and activities in class
Fifth	2	Student able to recognize sections in engineering drawing	5	Explanation, presentation of model and lecture	the exam, Quizzes, Reports, and activities in class
Sixth	2	The student will be familiar with the vertical projection of points, straight lines, and flat surfaces	6	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and activities in class
Seventh	2	The student will be familiar with the vertical projection of points, straight lines, and flat surfaces	7	Explanation, presentation of model and lecture	the exam, Quizzes, Reports, and activities in class
Eighth	2	student will know the complete sections	8	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and activities in class
Ninth	2	student will recognize the semi-section area	9	Explanation, presentation of model and lecture	the exam, Quizzes, Reports, and activities in class
Tenth	2	The student gets to know the sector parallel to the basic levels and its applications	10	Explanation, presentation of model and lecture	the exam, Quizzes, Reports, and activities in class

Eleventh	2	For the student to become familiar with exercises on the complete section and the semi-section	11	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and activities in class
Twelfth	2	Student becomes familiar with three-dimensional drawing and its conditions	12	Explanation, presentation of model and lecture	the exam, Quizzes, Reports, and activities in class
Thirteenth	2	Student becomes familiar with the solid drawing of three-dimensional drawing.	13	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and activities in class
fourteenth	2	student gets to know the isometric drawing.	14	Explanation, presentation of model and lecture	the exam, Quizzes, Reports, and activities in class
Fifteenth	2	Student becomes familiar with drawing parallel surfaces.	15	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and activities in class

47.Course Evaluation

1- Monthly tests	30
2- Daily tests	10
3- Daily duties and attendance	10

48.Learning and Teaching Resources

Required textbooks (curriculum books, if any)	Engineering drawing for students of the College of Agriculture (Dr. Eng. Natiq Sabri - University of Mosul 1995)
Main references (sources)	Engineering drawing (Professor Abdul Rasul Al-Khafaf University of Technology 1990)
Recommended books and references (scientific journals, reports...)	Engineering drawing books for all engineering disciplines - Noor Library
Electronic Websites	Referend https://www.gulf-up.com/uz2pnxd1v0st

49.Course Name:

human rights

50.Course Code:	
U.١٣١.٢	
51.Semester / Year:	
First/first	
52.Description Preparation Date:	
1\9\2023	
53.Available Attendance Forms:	
In person + electronic	
54.Number of Credit Hours (Total) / Number of Units (Total)	
Number of Credit Hours (Total) 3٠ hours	
55. Course administrator's name (mention all, if more than one name)	
Name: Prof. Dr. Muhammad Radwan Mahmoud Email: modrn@mu.edu.iq	
56.Course Objectives	
	<p>1The student's awareness of the historical development of human rights through explaining development and the various stages that occurred It has passed through to the present time.</p> <p>2- Introducing the student to human rights in the heavenly religions and emphasizing the role of the Islamic religion that has been preserved These rights are distinct.</p> <p>3- Educating the Iraqi student about his civil, political, economic, social and cultural rights.</p> <p>4 - The student will learn about the role of the United Nations and its beginnings in support and shaping the principles of human rights Then its development and the establishment of various human rights organizations.</p> <p>5- That the student will be able to know the rights and freedoms stipulated in the Iraqi Constitution of 2005</p> <p>6- That the student is able to defend his rights after possessing a culture of human rights.</p>
57.Teaching and Learning Strategies	
Strategy	<p>Strategic teaching and learning methods</p> <p>Audio methods (teaching explanation of the topic)</p> <p>Style of writing on the blackboard</p> <p>The method of direct dialogue between the teacher and the student, with the student's evaluation in class participation</p>

58.Course Structure					
Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
First	2	Introduction: What human rights are. Chapter One: The history of human rights	1	Explanation, presentation of model and lecture	Discussing and exams
the second	2	History of human rights in Iraqi civilizations and in Greek civilization and civilization	2	Explanation, presentation of model and lecture	Discussing and exams

		Roman, Persian and Egyptian			
the third	2	Human rights in religions Jewish and Christian heaven And Islam	3	Explanation, presentation of model and lecture	Discussing and exams
the fourth	2	History of human rights in Middle Ages feudalism The church and the royal institution	4	Explanation, presentation of model and lecture	Discussing and exams
Fifth	2	Human rights in legislation Rights Revolutions of the West and the East	5	Explanation, presentation of model and lecture	Discussing and exams
Sixth	2	Human rights and definition And the definition	6	Explanation, presentation of model and lecture	Discussing and exams
Seventh	2	First month exam	7	Explanation, presentation of model and lecture	Discussing and exams
Eighth	2	Forms of human rights	8	Explanation, presentation of model and lecture	Discussing and exams
Ninth	2	Civil human rights And political	9	Explanation, presentation of model and lecture	Discussing and exams

Tenth	2	Economic human rights Social and cultural	10	Explanation, presentation of model and lecture	Discussing and exams
Eleventh	2	Modern human rights	11	Explanation, presentation of model and lecture	Discussing and exams
Twelfth	2	Human rights in the declaration Universal 1948	12	Explanation, presentation of model and lecture	Discussing and exams
Thirteenth	2	Non-governmental organizations And human rights	13	Explanation, presentation of model and lecture	Discussing and exams
fourteenth	2	Human rights in the constitution Iraqi in 2005	14	Explanation, presentation of model and lecture	Discussing and exams
Fifteenth	2	Second month exam	15	Explanation, presentation of model and lecture	Discussing and exams

59.Course Evaluation

Distribution of the grade out of 100 according to the tasks assigned to the student, such as daily preparation, daily, oral, monthly, written exams, reports, etc.

60.Learning and Teaching Resources

Required textbooks (curriculum books, if any)	1-Human Rights, written by: Hafez Alwan Hamadi Al-Dulaimi 2- Universal human rights between theory and practice, written by Jack Donnelly.
---	---

	3-Human Rights, Children and Democracy, written by: Mah Saleh Allawi Al-Jubouri and others
Main references (sources)	The Philosophy of Human Rights, written by Ansam Amer . Sudani. Human Rights in the Western Religious Heritage and Islam, written by: Muhammad Jalaa Idris and Amal Muhammad Abd al-Rahman Rabie
Recommended books and references (scientific journals, reports...)	Iraqi -reviewed journals /https://www.elsevier.com
Electronic Websites	1-United Nations website: https://www.un.org/ar/global issues/human-rights - Website of the Office of the High Commissioner, United Nations High Commissioner for Human Rights https://www.ohchr.org/ar/hr-bodies/hrc/

Course Description Form

61.Course Name:
Principles of animal production
62.Course Code:
OC13104
63.Semester /
Year: the first 2024
64.Description Preparation Date
:٢٠٢٤/١/١٨
65.Available Attendance Forms:
weekly
66.Number of Credit Hours (Total) / Number of Units (Total)
30 hrs (3 unit)
67. Course administrator's name (mention all, if more than one name)
Name: Hassan Awied Fazaa Email: hassanawied@mu.edu.iq
68.Course Objectives

Course Objectives	<ul style="list-style-type: none"> Identify the general economic aspects Identify the economic aspect of agricultural projects and calculating economic feasibility Analysis of cost and revenue items for the agricultural project Identify the role of the agricultural sector in the economic structure of the country
--------------------------	---

69. Teaching and Learning Strategies

Strategy	
-----------------	--

70. Course Structure

Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
first.	3		*Overview of livestock production	Theoretical lecture	Theoretical exam
second.	3		*Classification of ruminants		
third.	3		*Livestock producing milk and meat		
fourth.	3		*Sheep meat and wool		
Fifth.	3		*International and local types of goats		
six.	3		*Buffalo breeding		
Seventh.	3		* Poultry classification		
Eight.	3		* Some methods of raising fish		
Ninth.	3		*Farm animal nutrition		
tenth.	3		Fish feeding*		
eleventh	3		* Some types of fish in Iraq		

71. Course Evaluation

Distributing the score out of 100 according to the tasks assigned to the student such as daily preparation, daily oral, monthly, or written exams, reports etc

72. Learning and Teaching Resources

Required textbooks (curricular books, if any)	* Principles of animal production * principles of fish farming
Main references (sources)	1-The basics of sheep and goat production, Dr. Ja Elia Al-Qass 2-Fish farming, Dr. Qamar Al-Daham 3- Milk cattle production, Dr. Naguib Tawfiq
Recommended books and references (scientific journals, reports...)	scientific journals
Electronic References, Websites	Internet websites

Course Description Form

73. Course Name:

Basics of field crops

74.Course Code:					
0C13105					
75.Semester / Year:					
First / first					
76.Description Preparation Date:					
27\2\2024					
77.Available Attendance Forms:					
In person + electronic					
78.Number of Credit Hours (Total) / Number of Units (Total)					
Number of Credit Hours (Total) 75 hours					
79. Course administrator's name (mention all, if more than one name)					
Name: Prof. Dr. Shaimaa Ibrahim Mahmood AL Refai Email: Shaimaaibrahim@mu.edu.iq					
80.Course Objectives					
Course Objectives <ul style="list-style-type: none"> • Strengthening efforts aimed at using and properly managing water resources. • Develop a future vision for developing water harvesting technologies to support water resource • Increasing the volume of irrigation water available for agricultural use, by adding dams, tanks, irrigation canals, and drilling wells, in addition to developing projects in this field and water supply projects. 			1- The course examines the identification of the most important grain crops in Iraq and the world 2-It includes studying the scientific methods used in growing grain crops 3 -Study the appropriate environmental conditions for growing each important field crop 4- Defining the most important ways to increase productivity for each field crop 5-Study the problems related to pests and diseases of each field crop		
81.Teaching and Learning Strategies					
Strategy		Strategic teaching and learning methods Audio methods (teaching explanation of the topic) Style of writing on the blackboard The method of direct dialogue between the teacher and the student, with the student's evaluation in class participation Conduct experiments.			
82. Course Structure					
Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
The first week	‣ Theoretical ‣ Practical		Field crops: their definition, Its development, its creators		Exams , reports, discussions Quizzes

second week	▼ Theoretical ▼ Practical		Environmental factors in Iraq and in The world and its relationship to crop growth Field, location and surface, climate Soil, water resources		Exams , reports, discussions
the third week	▼ Theoretical ▼ Practical		division of field crops, According to the life cycle		Exams , reports, discussions
fourth week	▼ Theoretical ▼ Practical		Temperature, factors affecting Heat, temperature relationship With crops, crop adaptation To reduce the effect of temperatures And temperature damage		Exams , reports, discussions
The fifth week	▼ Theoretical ▼ Practical		For light, the importance of light for plants, Adaptation of plants to light, importance Light in seed germination		Exams , reports, discussions
the sixth week	▼ Theoretical ▼ Practical		First monthly exam		Exams , reports, discussions
Seventh week	▼ Theoretical ▼ Practical		Water, water in the soil and its extent Crops benefit from it, balance internal water of the plant, Water consumption, efficient Water use, effect of water deficiency On crops, drought damage		Exams , reports, discussions
The eighth week	▼ Theoretical ▼ Practical		Soil, soil texture, composition Soil, soil components, matter Soil organics, soil water, Soil air, harmful effect Soil salts on crops		
Week nine	▼ Theoretical ▼ Practical		Air, air pollution, wind effect Crops, soil erosion by Crop winds		Exams , reports, discussions
The tenth week	▼ Theoretical ▼ Practical		Mutual benefit, competition, opposition		Exams , reports, discussions
Week eleven	▼ Theoretical ▼ Practical		Seeds and their importance, composition and maturity Seed dormancy, diagnosis Seed grading screening, storage Seeds, marketing		Exams , reports, discussions
The twelfth week	▼ Theoretical ▼ Practical		Weeds and ways to combat them		Exams , reports, discussions
The thirteenth week	▼ Theoretical ▼ Practical		The updated one Agricultural courses		Exams , reports, discussions

The fourteenth week	▼ Theoretical ▼ Practical		The updated one Breeding and improving field crops Major crops in the world And Iraq		Exams , reports, discussions
The fifteenth week			The second monthly exam		
83.Course Evaluation					
Distributing the score out of 100 according to the tasks assigned to the student such as daily preparation, daily oral, monthly, or written exams, reports etc					
84.Learning and Teaching Resources					
Required textbooks (curricular books, if any)			Principles of field crops Dr.. Majeed Mohsen Ansari Dr. Abdel Hamid Ahmed Al-Younis Dr.. Ghanem Saadallah Hasawi Dr. Wafqi Shaker Shamaa		
Main references (sources)			From methodological books, help books, Internet, and scientific research		
Recommended books and references (scientific journals, reports...)			Iraqi Scientific journals in basic specializations

97.Course Name:		
Geology		
98.Course Code:		
..٢٣١٠١		
99.Semester / Year:		
SECOND/FIRST		
100. Description Preparation Date:		
26\2\2024		
101. Available Attendance Forms:		
Actual presence		
102. Number of Credit Hours (Total) / Number of Units (Total)		
2 theoretical	3 practical	units 3.5
103. Course administrator's name (mention all, if more than one name)		
Name:As. Prof. Ahmed K. Fazaa Email ahmad.kadem @mu.edu.iq		
104. Course Objectives		

Course Objectiv	<ul style="list-style-type: none"> • The student gets to know the classification and types of fertilizers and their importance • • For the student to learn about methods of adding fertilizers • • The student should separate the positive and negative aspects of fertilizer and its harm to plants • • For the student to recognize pollution from chemical fertilizers • • The student should evaluate soil fertility •
------------------------	--

105. Teaching and Learning Strategies

Strategy	1-Explanation and clarification 2- Lecture method 3- Student groups 4- Practical lessons 5- Scientific trips 6 - Self-learning method
-----------------	--

106. Course Structure

Week	H ou rs	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
First	2	The student gets to know the concept of saline soils	Soil Salinity	Explanation, presentation of model and lecture	the exam
the second	2	For the student to know the sources of Soil	Geology	Explanation, presentation of model and lecture	the exam
the third	2	The student will be familiar with the means of Formation soil	Geology	Explanation, presentation of model and lecture	the exam
the fourth	2	The student will be familiar with the Rock formation	Geology	Explanation, presentation of model and lecture	the exam
Fifth	2	The student will be familiar with the conditions of soil formation	Geology	Explanation, presentation of model and lecture	the exam
Sixth	2	student gets to know the types Rocks	Geology	Explanation, presentation of model and lecture	the exam
Seventh	2	For the student to recognize the aspects the earth systems	Geology	Explanation, presentation of model and lecture	the exam
Eighth	2	The student will be familiar with the indicators for determining the effect of Geology	Geology	Explanation, presentation of model and lecture	the exam

Ninth	2	The student will be familiar with the means of increasing the ability of Field Geology	Geology	Explanation, presentation of model and lecture	the exam
The tenth	2	The student will be familiar with the factors determining the quality of irrigation water and the indicators used to determine the quality of irrigation water	Geology	Explanation, presentation of model and lecture	the exam
Eleventh	2	The student will be familiar with irrigation water classification systems	Geology	Explanation, presentation of model and lecture	the exam
Twelfth	2	The student will learn Ground Water	Geology	Explanation, presentation of model and lecture	the exam
Thirteenth	2	For the student to become familiar with problems of limestone soils	Geology	Explanation, presentation of model and lecture	the exam
fourteenth	2	The student will be familiar with the means of increasing the ability of plants to tolerate salinity	GEOLOGY	Explanation, presentation of model and lecture	the exam
Fifteenth	2		Soil Salinity	Explanation, presentation of model and lecture	the exam

107. Course Evaluation

1-Theoretical tests	25
2- Practical tests	15
3- Reports and studies	10
4- Final exam	50

108. Learning and Teaching Resources

Required textbooks (curriculum books, if any)	1- geology Book.
Main references (sources)	
Recommended books and references (scientific journals, reports...)	Iraqi academic scientific journals
Electronic Websites	Soil Science Society Of America

Course Description Form

109.	Course Name:
	organic chemistry
110.	Course Code:

OC23101					
111. Semester / Year:					
The first stage/spring semester					
112. Description Preparation Date:					
26/2/2024					
113. Available Attendance Forms:					
Presence					
114. Number of Credit Hours (Total) / Number of Units (Total)					
2 theoretical hours and 3 practical hours. Number of units: 3					
115. Course administrator's name (mention all, if more than one name)					
Name: Prof. Dr. Jassim Kassim Menati Email: jasimiraqe@mu.edu.iq					
116. Course Objectives					
Course Objectives			<ul style="list-style-type: none"> • 1 Providing students with general information about organic chemistry • 2 Introducing students to alkanes • 3 Introducing students to alkenes • 4 Explanation of alkynes for students 		
117. Teaching and Learning Strategies					
Strategy		1 Explanation and clarification 2 Lecture method 3 Student groups 4 Practical lessons in laboratories			
118. Course Structure					
Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
1	2	Theoretical lecture	Introduction to organic chemistry	A lecture	Quiz
2	2	Theoretical lecture	Alkanes	A lecture	Quiz
3	2	Theoretical lecture	Alkenes	A lecture	Quiz
4	2	Theoretical lecture	Alkynes	A lecture	Quiz
5	2	Exam	Exam	Exam	Exam
6	2	Theoretical lecture	Aliphatic cyclic compounds	A lecture	Quiz
7	2	Theoretical lecture	Formation of the aromatic ring - activity and direction -	A lecture	Quiz

			preparation – interactions		
8	2	Theoretical lecture	Aromatic compounds	A lecture	Quiz
9	2	Theoretical lecture	Amines	A lecture	Quiz
10	2	Exam	Exam	Exam	Exam
11	2	Theoretical lecture	Aliphatic and aromatic halides	A lecture	Quiz
12	2	Theoretical lecture	Alcohols, phenols and ethers	A lecture	Quiz
13	2	Theoretical lecture	Aldehydes and ketones	A lecture	Quiz
14	2	Theoretical lecture	Carboxylic acids	A lecture	Quiz
15	2	Theoretical lecture	Derivatives of carboxylic acids	A lecture	Quiz

119. Course Evaluation

Distributing the score out of 100 according to the tasks assigned to the student such as daily preparation, daily oral, monthly, or written exams, reports etc

120. Learning and Teaching Resources

Required textbooks (curricular books, if any)	Organic chemistry Abdul-Alah Al-Abdo and Ali Sulaiman Yoss
Main references (sources)	
Recommended books and references (scientific journals, reports...)	Journal of Organic Chemistry
Electronic References, Websites	https://publications.iupac.org/compendium/index.html

Course Description Form

121.	Course Name:
Fruit production	
122.	Course Code:
OC23102

Second/ First	
124.	Description Preparation Date:
26\2\2024	
125.	Available Attendance Forms:
Actual presence	
126.	Number of Credit Hours (Total) / Number of Units (Total)
2 theoretical 3 practical units 3.5	

127. Course administrator's name (mention all, if more than one name)

Name: Dr. Mohanad .T .Muften
Email: mohanadturki@mu.edu.iq

128. Course Objectives

Course Objectiv	<ul style="list-style-type: none"> • Enable students to distinguish between types of fruits according to their ar of growth and distribution • Enabling students to identify the most important types of fruits that fruit plants have • Introducing the student to the concept of floatation, types of flowers, and th relationship to pollination and parthenogenetic fruiting in plants • Introducing the student to vaccination and installation, the dates for performing it, the principles, and why we resort to vaccination and installati according to the principles
------------------------	--

129. Teaching and Learning Strategies

Strategy	1-Explanation and clarification 2- Lecture method 3- Student groups 4- Practical lessons 5- Scientific trips 6 - Self-learning method
-----------------	--

130. Course Structure

Week	H ou rs	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
First	5	Nutritional and economic importance	Fruit production	Explanation, presentation of model and lecture	the exam
the second	5	Factors affecting fruit trees	Fruit production	Explanation, presentation of model and lecture	the exam
the third	5	Division of fruit trees	Fruit production	Explanation, presentation of model and lecture	the exam
the fourth	5	Care, storage and marketing of fruit fr fruit trees	Fruit production	Explanation, presentation of model and lecture	the exam
Fifth	5	Fruit softening and its role in improv their properties	Fruit production	Explanation, presentation of model and lecture	the exam

Sixth	5	Multiplication of fruit trees	Fruit production	Explanation, presentation of model and lecture	the exam
Seventh	5	Vegetative propagation of fruit trees	Fruit production	Explanation, presentation of model and lecture	the exam
Eighth	5	Create orchids	Fruit production	Explanation, presentation of model and lecture	the exam
Ninth	5	Apples / pears – apples	Fruit production	Explanation, presentation of model and lecture	the exam
The tenth	5	Stone stones / apricots – peaches	Fruit production	Explanation, presentation of model and lecture	the exam
Eleventh	5	Pomegranate	Fruit production	Explanation, presentation of model and lecture	the exam
Twelfth	5	The Fig	Fruit production	Explanation, presentation of model and lecture	the exam
Thirteenth	5	Olive	Fruit production	Explanation, presentation of model and lecture	the exam
fourteenth	5	Date palm	Fruit production	Explanation, presentation of model and lecture	the exam
Fifteenth	5	The grape	Fruit production	Explanation, presentation of model and lecture	the exam

131. Course Evaluation

1-Theoretical tests	25
2- Practical tests	15
3- Reports and studies	10
4- Final exam	50

132. Learning and Teaching Resources

Required textbooks (curriculum books, if any)	Faslja Fruit Trees\Hassan Jundia - Evergreen Fruit\Makki Alw Al-Khafaji, Suhail Aliwi Atrah, and Alaa Abdel-Razzaq
Main references (sources)	Fruit production for departments not specialized in horticulture - Dr. Ali Hussein Abdullah Al-Douri / Dr. Adel Khader Saeed Raw
Recommended books and references (scientific journals, reports...)	Iraqi academic scientific journals

Course Description Form

133. Course Name:					
Surveying					
134. Course Code:					
OC23103					
135. Semester / Year: 2023-2024					
Second / first					
136. Description Preparation Date:					
1-9-2023					
137. Available Attendance Forms:					
Attended					
138. Number of Credit Hours					
(60) / Number of Units (3)					
139. Course administrator's name (mention all, if more than one name)					
Name: JAWAD KADHIM AL ARIDHEE					
Email: jawadaridhee@mu.edu.iq					
140. Course Objectives					
Course Objectives			<ul style="list-style-type: none"> to determine, measure and represent land, three-dimensional objects, points, fields and trajectories; to assemble and interpret land and geographically related information, to use that information for the planning and efficient administration of the land the sea and any structures thereon; and to conduct research into the above practices and to develop them 		
141. Teaching and Learning Strategies					
Strategy		1-Explaining the importance of using space and training students to benefit from agricultural aspect 2- Explaining the modern and advanced method in agriculture of finding points of high and and thus leveling agricultural lands			
142. Course Structure					
Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method

١	ξ	Definition of the surveying, the types of surveys, the requirements of a good survey and its the importance in agriculture		Theoretical + practical lecture	test
٢	ξ	Tape measurement- conditions for selecting stations- field book arrangement		Theoretical + practical lecture	test
٣	ξ	Measurement systems		Theoretical + practical lecture	test
٤	ξ	Mistakes& Errors in serving		Theoretical + practical lecture	test
٥	ξ	Drawing scale		Theoretical + practical lecture	test
٦	ξ	Areas-regular & irregular shapes		Theoretical + practical lecture	test
٧	ξ	Leveling terminology , types of adjustment, uses of the leveling device		Theoretical + practical lecture	test
٨	ξ	Types of levelling , the phenomena of curvature and fracture and their treatment.		Theoretical + practical lecture	test
٩	ξ	Methods of calculating point levels and elevation difference- direct and indirect		Theoretical + practical lecture	test
١٠	ξ	Making longitudinal sections		Theoretical + practical lecture	test
١١	ξ	Calculating point levels , measuring distances ,drawing them on graph paper		Theoretical + practical lecture	test
١٢	ξ	Calculating the areas and volumes		Theoretical + practical lecture	test
١٣	ξ	Topographic maps		Theoretical + practical lecture	test
١٤	ξ	Contour lines		Theoretical + practical lecture	test
١٥	ξ	Theodolite device		Theoretical + practical lecture	test

--	--	--	--	--	--

143. Course Evaluation

Distributing the score out of 100 according to the tasks assigned to the student such as daily preparation, daily oral, monthly, or written exams, reports etc

144. Learning and Teaching Resources

Course Description Form

157.	Course Name:
	English Language
158.	Course Code:
	U. ٢٣١-2
159.	Semester / Year:
	Second semester/ The first
160.	Description Preparation Date:
	26\2\2024
161.	Available Attendance Forms:
	Actual presence
162.	Number of Credit Hours (Total) / Number of Units (Total)
	theoretical 2 practical units 1
163.	Course administrator's name (mention all, if more than one name)
	Name: Assistant Professor Dr. Ahmed Merza Abood Email : ahmedme@mu.edu.iq
164.	Course Objectives
Course Objectiv	- Teaching students, the basic concepts related to access to the simple basics of an introduction the English language for students of the College of Agriculture.

	<ul style="list-style-type: none"> - The student gets to know the concept of the English language. - Enabling students to know how to deal with the English language
--	--

165. Teaching and Learning Strategies

Strategy	1-Explanation and clarification 2- Lecture method 3- Student groups 4- Practical lessons 5- Scientific trips 6 - Self-learning method
-----------------	--

166.Course Structure

Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
First	2	Hello: - (am/is/are, your,my) - This is - How are you? - Good morning - What's this in English? - Numbers 1-10, Plurals	1	Explanation, presentation of model and lecture	the exam, Quizzes, Reports, and activities in class
the second	2	Your world: - Countries -He/she/they, his/her -Where's he from? - Fantastic/awful/beautiful - Numbers 11-30	2	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and activities in class
the third	2	All about you: - Jobs - am/are/is - Negatives and questions - Personal information - Social expressions	3	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and activities in class
the fourth	2	Family and friends: - Our/their - Possessive's - The family - has/have - The alphabet	4	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and activities in class
Fifth	2	The way I live: - Sports/food/drinks -Present simple-I/you/we/they - a/an - Languages and nationalities - Numbers and prices	5	Explanation, presentation of model and lecture	the exam, Quizzes, Reports, and activities in class

Sixth	2	Every day: - The time - Present simple-he/she - Always/sometimes/never - Words that go together - Days of the week	6	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and activities in class
Seventh	2	My favourites: - Questions words - Me/him/us/them - This /that - Adjectives - Can I ...?	7	Explanation, presentation of model and lecture	the exam, Quizzes, Reports, and activities in class
Eighth	2	Where I live: - Rooms and furniture - There is/are - Prepositions - Directions	8	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and activities in class
Ninth	2	Times past: - Saying years - Was/where born - Past simple-irregular verbs - Have/do/go - When's your birthday	9	Explanation, presentation of model and lecture	the exam, Quizzes, Reports, and activities in class

Tenth	2	We had a great time: - Past simple-regular and irregular - Questions and negatives - Sport and leisure - Going sightseeing	10	Explanation, presentation of model and lecture	the exam, Quizzes, Reports, and activities in class
Eleventh	2	I can do that: - Can/can't - Adverbs - Adjective - Noun - Everyday problems	11	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and activities in class
Twelfth	2	Please and thank you: - I'd like-some/any - In a restaurant - Signs all around	12	Explanation, presentation of model and lecture	the exam, Quizzes, Reports, and activities in class
Thirteenth	2	Here and now: - Colours and clothes - Present continuous - Opposite verbs - What's the matter?	13	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and activities in class
fourteenth	2	It's time to go: - Future plans - Grammar revision - Vocabulary revision - Social expressions	14	Explanation, presentation of model and lecture	the exam, Quizzes, Reports, and activities in class
Fifteenth	2	Reviewing	15	Explanation, presentation of model and lecture	The exam, Quizzes, Reports,

					and activities in class
167. Course Evaluation					
1-Theoretical tests			35		
2- Quizzes, Reports, and Class's Activities			15		
4- Final exam			50		
168. Learning and Teaching Resources					
Required textbooks (curriculum books, if any)	Beginner Student's Book: New Headway Plus (John and Soars) Oxford University Press				
Main references (sources)					
Recommended books and references (scientific journals, reports...)

<table border="1" style="width: 100%; border-collapse: collapse;"> <tr> <td style="width: 50%; background-color: #e6f2ff;">Course Objectives</td> <td style="width: 50%;">- Active participation in the classroom</td> </tr> </table>	Course Objectives	- Active participation in the classroom
Course Objectives	- Active participation in the classroom	

	<ul style="list-style-type: none"> - Submit assignments from last week - Weekly participation
--	---

177. Teaching and Learning Strategies

Strategy	<p>1- Interest and knowledge of agricultural economics</p> <p>2- Defining the difference between general economics and agricultural economics</p> <p>3- Teaching students about the role of agricultural economics in supporting the economic development of the country</p>
----------	--

178.Course Structure

Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
First	5	Introduction to agricultural economics	The agricultural economy	Explanation presentation the model and lecture	Exams
second	5	The concept of the production function			
third	5	Diminishing returns and production stages			
fourth	5	The demand . Law of demand Factors affecting demand			
Fifth	5	Price elasticity of demand			
Sixth	5	Supply - Law of Supply Factors affecting supply	The agricultural economy		Exams
Seventh	5	Price elasticity of supply			

Eighth	5	Price and equilibrium price		Explanation, presentation of model and lecture	
Ninth	5	Production costs			
Tenth	5	Agricultural prices			
Eleventh	5	Economic derivatives of cost functions			
Twelveth	5	Ways to reduce cost Principle of equal marginal returns The principle of opportunity costs	The agricultural economy	Explanation, presentation of model and lecture	Exams

179. Course Evaluation

1- Theoretical tests	25
2- Practical tests	15
3- Reports and studies	10
4- Final exam	50

180. Learning and Teaching Resources

Required textbooks (curricular books, if any)	Agricultural Economics - Abdul Wahab Matar Al-Dahri Economic Theory - Ahmed Zubair Geata The Economics of Agricultural Production - David Debreton - Translated by Salem Younis Al-Naimi
--	---

5. Conduct daily tests for students in addition to monthly tests.

190. Course Structure

Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
1st	2	Cardinal functions and integration	Mathematic 1	Explanation and presentation Model and lecture	Examination
2nd	2	Laws of indefinite integration for algebraic functions	Mathematic 1	Explanation and presentation Model and lecture	Examination
3rd	2	Laws of indefinite integration for trigonometric functions	Mathematic 1	Explanation and presentation Model and lecture	Examination
4th	2	Laws of indefinite integration for exponential functions	Mathematic 1	Explanation and presentation Model and lecture	Examination
5th	2	Retail integration	Mathematic 1	Explanation and presentation Model and lecture	Examination
6th	2	Definite integral and its basic theorem	Mathematic 1	Explanation and presentation Model and lecture	Examination
7th	2	Calculate the area under the curve of a function using definite integration	Mathematic 1	Explanation and presentation Model and lecture	Examination
8th	2	The concept of the purpose of the function	Mathematic 1	Explanation and presentation Model and lecture	Examination
9th	2	Definitions of the purpose of the function and its theorems	Mathematic 1	Explanation and presentation Model and lecture	Examination
10th	2	The continuity of the function at a given point	Mathematic 1	Explanation and presentation Model and lecture	Examination
11th	2	Some theorems of continuity	Mathematic 1	Explanation and presentation Model and lecture	Examination

12 th	2	Algebraic operations on continuous functions	Mathematic 1	Explanation and presentation Model and lecture	Examination
13 th	2	Continuity at a number And continuity in the field	Mathematic 1	Explanation and presentation Model and lecture	Examination
14 th	2	Continuous functions and solving equations	Mathematic 1	Explanation and presentation Model and lecture	Examination
15 th	2	Solved problems and examples of continuity	Mathematic 1	Explanation and presentation Model and lecture	Examination

191. Course Evaluation

1-Theoretical tests 30

2- Daily tests 10

3- Homework 10

4- Final exam 50

192. Learning and Teaching Resources

Required textbooks (curricular books, if any)	1- George B. Thomas, 2003. Calculus and Analytic Geometry.
Main references (sources)	1- Theories and problems in advanced calculus. 2008. Murray R. SPIEGEL. Eighth Arabic edition. International House for Cultural Investments. 212.	Course Objectives

Course Objectives	<ul style="list-style-type: none">• Introducing the student to the importance of biochemistry• Study of carbohydrates• Study of amino acids• Study of lipids• Study of nucleic acids				
213. Teaching and Learning Strategies					
Strategy	Audio methods (teaching explanation of the topic) Style of writing on the blackboard The method of direct dialogue between the teacher and the student, with the student's evaluation in class participation				
214. Course Structure					
Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
First	2	Theoretical lecture	Carbohydrates - their definition - their sections	Explanation, presentation of model and lecture	the exam, Quizzes, Reports, and activities in class
the second	2	Theoretical lecture	Monosaccharides	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and activities in class
the third	2	Theoretical lecture	Low polysaccharides	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and activities in class
the fourth	2	Theoretical lecture	Polysaccharides	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and activities in class
Fifth	2	Exam	Exam	Explanation, presentation of model and lecture	the exam, Quizzes, Reports, and activities in class
Sixth	2	Theoretical lecture	Amino acids - their divisions - their interactions	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and activities in class
Seventh	2	Theoretical lecture	Proteins - their composition, structure, and divisions	Explanation, presentation of model and lecture	the exam, Quizzes, Reports, and

					activities in class
Eighth	2	Theoretical lecture	Fatty acids - their divisions - their interactions	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and activities in class
Ninth	2	Theoretical lecture	Simple lipids - their structure - their divisions	Explanation, presentation of model and lecture	the exam, Quizzes, Reports, and activities in class

Tenth	2	Theoretical lecture	Exam	Explanation, presentation of model and lecture	the exam, Quizzes, Reports, and activities in class
Eleventh	2	Theoretical lecture	Compound and derived lipids - their composition - their divisions	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and activities in class
Twelfth	2	Theoretical lecture	Nucleic acids, their importance	Explanation, presentation of model and lecture	the exam, Quizzes, Reports, and activities in class
Thirteenth	2	Theoretical lecture	Its composition and sections	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and activities in class
fourteenth	2	Theoretical lecture	Enzymes, their characteristics	Explanation, presentation of model and lecture	the exam, Quizzes, Reports, and activities in class
Fifteenth	2	Theoretical lecture	Factors affecting it	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and activities in class

215. Course Evaluation

- Distribution of the grade out of 100 according to the tasks assigned to the student, such as daily preparation, daily, oral, monthly, written exams, reports, etc.

216. Learning and Teaching Resources

Required textbooks (curriculum books, if any)	Foundations of biochemistry Ali Al-Daoudi
Main references (sources)	Integrated biochemistry

	Hohn W. Pelley
Recommended books and references (scientific journals, reports...)	List of chemistry journals

	<div style="display: flex; justify-content: space-between;"> <div style="width: 45%;"> The student gets to know soil science </div> <div style="width: 50%;"> <ul style="list-style-type: none"> The student gets to know soil science The student should classify the factors processes of soil formation The student should separate the various fac in the formation of soil For the student to learn about how soil formed and developed For the student to evaluate the different ty of soil </div> </div>
225.	• The student should classify the factors and processes of soil formation

Strategy	1- Explanation and clarification 2- Lecture method 3- Student groups 4- Practical lessons 5- Scientific trips 6 - Self-learning method
-----------------	---

226.Course Structure

Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
The first	5	<p>The student will be familiar with an introduction to soil science and the emergence and development of soils</p> <p>The student gets to know the types of factors and soil formation processes</p>	Soil principles	Explanation, presentation of the model and lecture	the exam
The second	5				
Third	5	The student gets to know the physical properties of soil	Soil principles	Explanation, presentation	the exam

				of the model and lecture	
Fourth		The student gets to know the chemical properties of soil	Soil principles	Explanation, presentation of the model and lecture	the exam
Fifth		The student gets to know the biological characteristics of soil	Soil principles	Explanation, presentation of the model and lecture	the exam
Sixth		The student gets to know soil salinity	Soil principles	Explanation, presentation of the model and lecture	the exam
Seventh		The student will be familiar with the reclamation of saline soils	Soil principles	Explanation, presentation of the model and lecture	the exam
Eighth		The student gets to know the types of soil water	Soil principles	Explanation, presentation of the model and lecture	the exam

Ninth		The student gets to know soil colloids	Soil principles	Explanation, presentation of the model and lecture	the exam
Tenth		The student will learn about the effect of humidity on plants	Soil principles	Explanation, presentation of the model and lecture	the exam
Eleventh		The student gets to know soil fertility	Soil principles	Explanation, presentation of the model and lecture	the exam
Twelfth	5	For the student to recognize the most important reasons for low soil productivity			the exam
thirteenth		The student will know how to feed plants	Soil principles	Explanation, presentation of the model and lecture	the exam

Fourteenth		The student gets to know the classification of soils	Soil principles	Explanation, presentation of the model and lecture	the exam
Fifteenth		For the student to become familiar with educational administration	Sustainable development	Explanation, presentation of the model and lecture	the exam

227. Course Evaluation

1- Theoretical tests	25
2- Practical tests	15
3- Reports and studies	10
4- Final exam	50

262. Course Structure

Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
first	2	Vegetable production	Introduction, definition, original homeland	Explanation, presentation of model and lecture	the exam, Quizzes, Reports, and activities in class
the second	2	Vegetable production	Classification of vegetable crops	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and activities in class
the third	2	Vegetable production	Divide vegetables	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and activities in class
the fourth	2	Vegetable production	Vegetable crop service operations	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and

					activities in class
Fifth	2	Vegetable production	Horticultural facility and tools needed for growing vegetables	Explanation, presentation of model and lecture	the exam, Quizzes, Reports, and activities in class
Sixth	2	Vegetable production	Vegetable reproduction: sexual reproduction and asexual reproduction	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and activities in class
Seventh	2	Vegetable production	Irrigation of vegetable crops	Explanation, presentation of model and lecture	the exam, Quizzes, Reports, and activities in class
Eighth	2	Vegetable production	Fertilizing vegetable crops	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and activities in class
Ninth	2	Vegetable production	Physiological diseases of vegetables	Explanation, presentation of model and lecture	the exam, Quizzes, Reports, and activities in class

tenth	2	Vegetable production	Organic Agriculture	Explanation, presentation of model and lecture	the exam, Quizzes, Reports, and activities in class
Eleventh	2	Vegetable production	Important vegetable crops in Iraq: Solanaceae family: tomato, potato	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and activities in class
Twelfth	2	Vegetable production	Pepper, eggplant	Explanation, presentation of model and lecture	the exam, Quizzes, Reports, and activities in class
Thirteenth	2	Vegetable production	Cucurbita family: cucumber and squash	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and activities in class
fourteenth	2				

Fifteenth	2				
263. Course Evaluation					
1- Theoretical tests	25				
2- Practical tests	15				
3- Reports and studies	10				
4- Final exam	50				
264. Learning and Teaching Resources					
Required textbooks (curriculum books, if any)		Vegetable Production, Part One, written by Adnan Nassar Matloob, Ezz El-Din Sultan, and Karim Saleh			
Main references (sources)					
Recommended books and references (scientific journals, reports...)		Iraqi academic scientific journals			
Electronic Websites		Internet network			

Course Description Form

265.	Course Name:
	Applications in computers
266.	Course Code:
	U. ۱۳۲.۱
267.	Semester / Year:
	First / second
268.	Description Preparation Date:
	1/9/2023
269.	Available Attendance Forms:
	Actual presence
270.	Number of Credit Hours (Total) / Number of Units (Total)
	2 / 2
271.	Course administrator's name (mention all, if more than one name)
	Name: Dr. Karrar Hameed Abdulkareem Email: khak9784@mu.edu.iq
272.	Course Objectives
Course Objectives	<ul style="list-style-type: none"> The student gets to know Microsoft PowerPoint The student should know advantages of Microsoft PowerPoint in real life. The student should apply many examples that relative to agriculture sector as well as other sectors.

273. Teaching and Learning Strategies					
Strategy	1-Explanation and clarification. 2- Practical lessons. 3- Self-learning method.				
274.Course Structure					
Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
First	2	Introduction to Microsoft PowerPoint	Microsoft PowerPoint	Explanation, presentation of model and lecture	Exam
Second	2	Tabs and groups	Microsoft PowerPoint	Explanation, presentation of model and lecture	Exam
Third	2	Tabs and groups	Microsoft PowerPoint	Explanation, presentation of model and lecture	Exam
Fourth	2	Practical Example	Microsoft PowerPoint	Practical session	Exam
Fifth	2	Practical Example	Microsoft PowerPoint	Practical session	Exam
Sixth	2	Tables	Microsoft PowerPoint	Explanation, presentation of model and lecture	Exam
Seventh	2	Deals with movies	Microsoft PowerPoint	Explanation, presentation of model and lecture	Exam
Eighth	2	Deals with movies	Microsoft PowerPoint	Explanation, presentation of model and lecture	Exam
Ninth	2	Shapes, smartart, and charts	Microsoft PowerPoint	Explanation, presentation of model and lecture	Exam
Tenth	2	Practical Example	Microsoft PowerPoint	Practical session	Exam
Eleventh	2	Practical Example	Microsoft PowerPoint	Practical session	Exam
Twelfth	2	Shapes, smartart, and charts	Microsoft PowerPoint	Explanation, presentation of model and lecture	Exam
Thirteenth	2	Shapes, smartart, and charts	Microsoft PowerPoint	Explanation, presentation of model and lecture	Exam
fourteenth	2	Practical Example	Microsoft PowerPoint	Practical session	Exam
Fifteenth	2	Practical Example	Microsoft PowerPoint	Practical session	Exam
275. Course Evaluation					
1-Theoretical tests		25			
2- Practical tests		15			

3- Reports and studies	10
4- Final exam	50
276. Learning and Teaching Resources	
Required textbooks (curriculum books, if any)	
Main references (sources)	1- Microsoft Excel 2016 Step by Step 1st Edition by Curtis Frye 2- Microsoft Excel 2016 prepared by Muhammad Malik
Recommended books and references (scientific journals, reports...)

Course Description Form

277.	Course Name:
	Agricultural machinery and equipment
278.	Course Code:
	OC13204
279.	Semester / Year: 2023-2024
	First / second
280.	Description Preparation Date:
	1-9-2023
281.	Available Attendance Forms:
	Attended
282.	Number of Credit Hours (60) / Number of Units (3)
	60 hrs / 3 units
283.	Course administrator's name (mention all, if more than one name)
	Name: JAWAD KADHIM AL ARIDHEE Email: jawadaridhee@mu.edu.iq
284.	Course Objectives

Course Objectives	is machinery used in farming or other agriculture. There are many types of such equipment, from hand tools and power tools to tractors and the countless kinds of farm implements that they tow or operate. Diverse arrays of equipment are used in both organic and nonorganic farming. Especially since the advent of mechanized agriculture, agricultural machinery is an indispensable part of how the world is fed
--------------------------	---

285. Teaching and Learning Strategies

Strategy	
-----------------	--

286. Course Structure

Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
1	ε	Classification of tractors , Mechanical transmission methods		Theoretical + practical lecture	test
2	ε	Internal combustion engine parts		Theoretical + practical lecture	test
3	ε	Four – stroke cycle& Two – stroke cycle		Theoretical + practical lecture	test
4	ε	Timer device		Theoretical + practical lecture	test
5	ε	Clutch Device		Theoretical + practical lecture	test
6	ε	Gearbox and Transmission devices		Theoretical + practical lecture	test
7	ε	Fuel System		Theoretical + practical lecture	test
8	ε	Cooling System		Theoretical + practical lecture	test
9	ε	Lubrication System		Theoretical + practical lecture	test

١٠	٤	Hydraulic devices. Power take - off shaft		Theoretical + practical lecture	test
١١	٤	Soil preparation equipment		Theoretical + practical lecture	test
١٢	٤	Control equipment - Spraying equipment		Theoretical + practical lecture	test
١٣	٤	Fogging equipment		Theoretical + practical lecture	test
١٤	٤	Sprinkler calibration		Theoretical + practical lecture	test
١٥	٤	Maintenance of control equipment		Theoretical + practical lecture	test

287. Course Evaluation

Distributing the score out of 100 according to the tasks assigned to the student such as daily preparation, daily oral, monthly, or written exams, reports etc

288. Learning and Teaching Resources

Required textbooks (curricular books, if any)	Agricultural machinery
Main references (sources)	Basic Farm Machinery .J.M.shippen,C.R.E and C.H.Clover
Recommended books and references (scientific journals, reports...)	
Electronic References, Websites	

Course Description Form

289. Course Name	
Soil, water and plant analysis	
290. Course Code:	
.. ٢٣٢٠١	
Semester / Year:	
291.	
Second / second	
292. Description Preparation Date:	
26/2/2024	
293. Available Attendance Forms:	
Actual presence	
294. Number of Credit Hours (Total) / Number of Units (Total)	
2 theoretical 2 practical , units 2	
295. Course administrator's name (mention all, if more than one name)	
Name: Prof. Dr. raheem alwan halool	
Email: Rahim_alwan@mu.edu.iq	
296. Course Objectives	
Course Objectives	<p>For the student to know the types of analytical methods</p> <ul style="list-style-type: none"> • The student learns how to analysis water , soil and plant • The student should evaluate the scientific reality to maintain analytical methods •
297. Teaching and Learning Strategies	
Strategy	1- Explanation and clarification

	2- Lecture method 3- Student groups 4- Practical lessons 5- Scientific trips 6 - Self-learning method
--	---

298.Course Structure

Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
The first	5	The student gets to know introduction about water , soil plant analytical	Water , soil and plant analytical	Explanation, presentation of the model and lecture	the exam
The second	5	is for the student to know analytical of water			
Third	5	The student learns about soil analytical	Water , soil plant analytical	Explanation, presentation of the	the exam

				model and lecture	
Fourth	5	The student gets to know plant analytical	Water , soil plant analyti	Explanati on, presentati on of the model and lecture	the exam
Fifth	5	: The student learns about methods of soil samples	Water , soil plant analyti	Explanati on, presentati on of the model and lecture	the exam
Sixth	5	: The student learns about methods of plant samples	Water , soil and plant analytical	Explanati on, presentati on of the model and lecture	the exam
Seventh	5	: The student gets to know the methods of	Water , soil plant analyti	Explanati on, presentati	the exam

		water samples methods		on of the model and lecture	
Eighth	5	The student gets to know the quantitative and volumetric methods	Water , soil plant analyti	Explanati on, presentati on of the model and lecture	the exam
Ninth	5	The student gets to know the quantitative and weighing methods	Water , soil plant analyti	Explanati on, presentati on of the model and lecture	the exam
Tenth	5	: The student will learn about electrical of a Analytical methods	Water , soil plant analyti	Explanati on, presentati on of the model and lecture	the exam
Eleventh		The student gets to know	Water , soil plant analyti	Explanati on,	the exam the exam

Twelfth	5	About analytical of spectroscopy The student gets to know Atomic emission methods		presentati on of the model and lecture	
thirteenth	5	: The student knows how the Atomic absorption methods	Water , soil plant analyti	Explanati on, presentati on of the model and lecture	the exam
Fourteenth	5	: The student gets to know Metal analysis methods	Water , soil plant analyti	Explanati on, presentati on of the model and lecture	the exam
Fifteenth	5	The student gets to know the types of X-ray analysis methods	Water , soil plant analyti	Explanati on, presentati	the exam

				on of the model and lecture	
299. Course Evaluation					
Theoretical tests	25				
2- Practical tests	15				
3- Reports and studies	10				
4- Final exam	50				
300. Learning and Teaching Resources					
Required textbooks (curricular books, if any)					
Main references (sources)					
Recommended books and references (scientific journals, reports...)			Iraqi academic scientific journals

Course Description Form

301.	Course Name:
	Fundamentals of plant protection
302.	Course Code:
	0C222.1
303.	Semester / Year:
	Second semester / The second
304.	Description Preparation Date:
	1\9\2023
305.	Available Attendance Forms:
	Actual presence
306.	Number of Credit Hours (Total) / Number of Units (Total)
	theoretical 30 hrs practical 45 hrs units 3.5
307.	Course administrator's name (mention all, if more than one name)

Name: Assistant prof. Dr. Saad Manea

Email: alifj80@mu.edu.iq

308. Course Objectives

Course Objectives	<p>Enabling students to obtain knowledge and understanding of the intellectual and applied framework in insect principles in general</p> <ul style="list-style-type: none"> • Enabling students to obtain knowledge and understanding of insecticide requirements accordance with international standards. • Introducing students to modern techniques in the basis of protection from insects and diseases through showing films, scientific research, and methods of diagnosing insects.
--------------------------	--

309. Teaching and Learning Strategies

Strategy	<p>1-Explanation and clarification 2- Lecture method 3- Student groups 4- Practical lessons 5- Scientific trips 6 - Self-learning method</p>
-----------------	---

310. Course Structure

Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
first	5	The taxonomic position of insects and its relationship to the arthropod phylum	Fundamentals of plant protection	Explanation, presentation of model and lecture	the exam, Quizzes, Reports, and activities in class
the second	5	Its importance, benefits and harms	Fundamentals of plant protection	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and activities in class
the third	5	Its spread and the reasons for its success	Fundamentals of plant protection	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and activities in class
the fourth	5	Methods of insect reproduction	Fundamentals of plant protection	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and activities in class
Fifth	5	Insect feeding methods	Fundamentals of plant protection	Explanation, presentation of model and lecture	the exam, Quizzes, Reports,

					and activities in class
Sixth	5	Examples of the most important economic insects in Iraq	Fundamentals of plant protection	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and activities in class
Seventh	5	Environmental factors affecting the life and activity of insects	Fundamentals of plant protection	Explanation, presentation of model and lecture	the exam, Quizzes, Reports, and activities in class
Eighth	5		Fundamentals of plant protection	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and activities in class
Ninth	5	Ways to combat harmful insects	Fundamentals of plant protection	Explanation, presentation of model and lecture	the exam, Quizzes, Reports, and activities in class

tenth	5	The nature and damage of non-insect pests (rodents and birds)	Fundamentals of plant protection	Explanation, presentation of model and lecture	the exam, Quizzes, Reports, and activities in class
Eleventh	5	The economic importance of plant diseases - definitions and terms	Fundamentals of plant protection	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and activities in class
Twelfth	5	Parasitic plant pathogens (biological)	Fundamentals of plant protection	Explanation, presentation of model and lecture	the exam, Quizzes, Reports, and activities in class

311. Course Evaluation

5- Theoretical tests	25
6- Practical tests	15
7- Reports and studies	10

8- Final exam

50

312. Learning and Teaching Resources

Required textbooks (curriculum books, if any)	-Required readings: -Basic texts -Course books -Other
Main references (sources)	Special requirements (including, for example, workshops, periodicals, software, and websites)
Recommended books and references (scientific journals, reports...)	Social services (including, for example, guest lectures, vocational training, and field studies) Iraqi academic scientific journals
Electronic Websites	Internet network

Course Description Form

313. Course Name:

Soil environment and weather conditions

314. Course Code:

...٢٣٢٠٢

315. Semester / Year:

Second / second

316. Description Preparation Date:

26\2\2024

317. Available Attendance Forms:

Actual presence

318. Number of Credit Hours (Total) / Number of Units (Total)

2 theoretical 2 practical units 3

319. Course administrator's name (mention all, if more than one name)

Name: Prof. Dr. Abdullah Karim Jabbar

Email: mu.edu.iq@karmm^٧ξ-abdallah

320. Course Objectives

Course Objectiv	<ul style="list-style-type: none"> • The student gets to know environmental science • The student should classify climate factors and their relationship to soil • The student should detail the benefits and harms of climatic factors such as temperature, wind, and frost • The student should know about pollution and its causes • The student will evaluate desertification and global warming.....
-----------------	--

321. Teaching and Learning Strategies

Strategy	1-Explanation and clarification 2- Lecture method 3- Student groups 4- Practical lessons 5- Scientific trips 6 - Self-learning method
-----------------	--

322.Course Structure

Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
First	2	The student gets an introduction to ecology and the ecosystem	Soil environment weather conditions	Explanation, presentation of model and lecture	the exam
the second	2	The student gets to know types of ecosystems and factors	Soil environment weather conditions	Explanation, presentation of model and lecture	the exam
the third	2	For the student to learn about the importance of biological water and the division of plants according to their need for water, rain, and the effectiveness	Soil environment weather conditions	Explanation, presentation of model and lecture	the exam
the fourth	2	The student gets to know condensation and frost	Soil environment weather conditions	Explanation, presentation of model and lecture	the exam
Fifth	2	The student gets to know temperature and thermal range of plants and the effect of heat stress	Soil environment weather conditions	Explanation, presentation of model and lecture	the exam
Sixth	2	The student will be familiar with the nature of thermal stress, effect of heat on vegetation, thermal synchrony, and ambient temperature	Soil environment weather conditions	Explanation, presentation of model and lecture	the exam
Seventh	2	The student gets to know light and the biological effects of light	Soil environment weather conditions	Explanation, presentation of model and lecture	the exam
Eighth	2	The student gets to know point of photocompensation and the effect of light on the shape and structure of plants	Soil environment weather conditions	Explanation, presentation of model and lecture	the exam
Ninth	2	The student will be familiar with humidity and the decrease in degree of saturation	Soil environment weather conditions	Explanation, presentation of model and lecture	the exam

The tenth	2	The student will learn about effect of humidity on plants	Soil environment weather conditions	Explanation, presentation of model and lecture	the exam
Eleventh	2	For the student to get to know Winds, their types, harms and benefits to plants	Soil environment weather conditions	Explanation, presentation of model and lecture	the exam
Twelfth	2	The student gets to know most important contemporary environmental issues	Soil environment weather conditions	Explanation, presentation of model and lecture	the exam
Thirteenth	2	The student will be familiar with pollution and its interrelated effects	Soil environment weather conditions	Explanation, presentation of model and lecture	the exam
fourteenth	2	The student will be familiar with the phenomenon of inverse gradient and global warming	Soil environment weather conditions	Explanation, presentation of model and lecture	the exam
Fifteenth	2	The student gets to know desertification, its types and causes	Soil environment weather conditions	Explanation, presentation of model and lecture	the exam

323. Course Evaluation

1-Theoretical tests	25
2- Practical tests	15
3- Reports and studies	10
4- Final exam	50

324. Learning and Teaching Resources

Required textbooks (curriculum books, if any)	1- Fundamentals of Agricultural Climatology. 2015. Salam H. Ahmed Al-Jubouri. Amman. Jordan. 2- Plant ecology. 1989. Dr. Majeed Rashid Al-Hilli and Dr. Hikmah Abbas Al-Ani. Dar Al-Kutub for Printing and Publishing. Iraq University of Al Mosul.
Main references (sources)	Environment and problems of pollution. 2017. Muhammad Hassan Awad and Hassan Ahmed Shehata. Dar Taiba Publishing and Distribution. Cairo. Egypt.

Course Description Form

325.	Course Name:
Agricultural extension	
326.	Course Code:
OC23202	
327.	Semester / Year:
Second semester / The second	
328.	Description Preparation Date:

26\2\2024					
329. Available Attendance Forms:					
Actual presence					
330. Number of Credit Hours (Total) / Number of Units (Total)					
theoretical 2		practical		units 2	
331. Course administrator's name (mention all, if more than one name)					
Name: Assistant prof. Mustafa Abd Manshood Email : mustafa.manshood@mu.edu.iq					
332. Course Objectives					
Course Objectives	<ul style="list-style-type: none"> • Teaching and introducing students to the most important link in the agricultural extension system, which is the agricultural extension worker and his role in transferring scientific material from scientific research departments and delivering it to farms with some ease and guidance. • Teaching students the art of adopting positive ideas in the field of agriculture 				
333. Teaching and Learning Strategies					
Strategy	1-Explanation and clarification 2- Lecture method 3- Student groups 4- Practical lessons 5- Scientific trips 6 - Self-learning method				
334. Course Structure					
Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
First	2		About agricultural extension	Explanation, presentation of model and lecture	the exam, Quizzes, Reports, and activities in class
the second	2		Types of extension training	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and activities in class

the third	2		Contact method	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and activities in class
the fourth	2		Creation and spread of modern innovations	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and activities in class
Fifth	2		Leadership	Explanation, presentation of model and lecture	the exam, Quizzes, Reports, and activities in class
Sixth	2		Planning extension programs	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and activities in class
Seventh	2		Agricultural extension methods and extension methods	Explanation, presentation of model and lecture	the exam, Quizzes, Reports, and activities in class
Eighth	2		Agricultural extension philosophy	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and activities in class
Ninth	2		Education and teaching	Explanation, presentation of model and lecture	the exam, Quizzes, Reports, and activities in class

Tenth	2		The importance of using modern irrigation methods and their economic impacts	Explanation, presentation of model and lecture	the exam, Quizzes, Reports, and activities in class
Eleventh	2		The role of agricultural extension in improving archaeological areas	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and activities in class
Twelfth	2		Water crisis	Explanation, presentation of model and lecture	the exam, Quizzes, Reports, and activities in class

Thirteenth	2				
fourteenth	2				
Fifteenth	2				
335. Course Evaluation					
1-Theoretical tests, Quizzes, Reports, and Class's Activities				50	
4- Final exam				50	
336. Learning and Teaching Resources					
Required textbooks (curriculum books, if any)		Principles of agricultural extension - Abdullah Al-Samarrai			
Main references (sources)		1-Planning extension programs 1992 - Abdullah Al-Samarrai 2- Agricultural Extension Science 1990- Adnan Hussein Al-Ja

Course Description Form

337. Course Name:
Lands leveling and grading
338. Course Code:
..٢٣٢.٣
339. Semester / Year
Second/ second
340. Description Preparation Date:
1/9/2023
341. Available Attendance Forms:
Attended
342. Number of Credit Hours / Number of Units
60 hrs / 3 units
343. Course administrator's name (mention all, if more than one name)
Name: JAWAD KADHIM AL ARIDHEE Email: jawadaridhee@mu.edu.iq
344. Course Objectives

Course Objectives	<ul style="list-style-type: none"> Increasing the production of agricultural crops in quantity and quality due to the distribution of water in the field at approximately one depth Ease of irrigation, as the water is distributed evenly throughout the field. This means reducing the amount of water required by the irrigation process and reducing the effort and time required for this process, unlike uneven lands that require a large amount of irrigation water in addition to the greater time and effort to do
--------------------------	--

345. Teaching and Learning Strategies

Strategy	1- Create a slope that provides an appropriate amount of water 2- Leveling the field in the best way using the least possible amount of soil transport for the purpose of leveling
-----------------	---

346. Course Structure

Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
١	٤	Definition of the Lands leveling and grading		Theoretical + practical lecture	test
٢	٤	Types of leveling - application requirements		Theoretical + practical lecture	test
٣	٤	the factors that must be followed before starting work to level and modify: soil factors, environmental factors, plants, and human factors		Theoretical + practical lecture	test
٤	٤	Topographic variation: its relationship to of level - estimation methods - direct methods - indirect methods		Theoretical + practical lecture	test
٥	٤	Land leveling without slope		Theoretical + practical lecture	test
٦	٤	Field works - implementation methods - work stages - calculations and estimation		Theoretical + practical lecture	test
٧	٤	the leveling ground with one slope		Theoretical + practical lecture	test
٨	٤	the leveling ground with two slope		Theoretical + practical lecture	test

٩	٤	Calculations, estimates and evaluation		Theoretical + practical lecture	test
١٠	٤	Selection of machines		Theoretical + practical lecture	test
١١	٤	Types of machines - testing standards - efficiency and utilization of machines		Theoretical + practical lecture	test
١٢	٤	Laser leveling		Theoretical + practical lecture	test
١٣	٤	Make a leveling plan		Theoretical + practical lecture	test
١٤	٤	Times for leveling - and ways to succeed		Theoretical + practical lecture	test

347. Course Evaluation

Distributing the score out of 100 according to the tasks assigned to the student such as daily preparation, daily oral, monthly, or written exams, reports etc

348. Learning and Teaching Resources

Required textbooks (curricular books, if any)	Surveying
Main references (sources)	Basic Farm Machinery .J.M.shippen,C.R.E and C.H.Clover
Recommended books and references (scientific journals, reports...)	
Electronic References, Websites

370.Course Structure					
Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluati on method
First	2	Getting to know you: - Tenses - Questions - Using a bilingual dictionary - Social expressions 1	1	Explanation, presentation of model and lecture	the exam, Quizzes, Reports, and activities in class
the secon	2	The way we live: - Present tenses - Have/have got - Collocation-daily life - Making conversation	2	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and activities in class
the third	2	It all went wrong: - Past tenses - Word formation - Time expressions	3	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and

					activities in class
the fourth	2	Let's go shopping: - Much/many - Some/any - A few, a little, a lot of - Articles - Shopping, prices	4	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and activities in class
Fifth	2	What do you want to do? - Verb patterns 1 - future forms - Hot verbs - How are you feel?	5	Explanation, presentation of model and lecture	the exam, Quizzes, Reports, and activities in class
Sixth	2	Tell me! What's it like? - What ...like? - Comparatives and superlatives - Synonyms and antonyms - Directions	6	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and activities in class
Seventh	2	Fame: - Present perfect - For, since - Adverbs, word pairs - Short answers	7	Explanation, presentation of model and lecture	the exam, Quizzes, Reports, and activities in class
Eighth	2	Do's and don'ts: - Have(got) to - Should/must - Words that go together - At the doctor's	8	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and activities in class
Ninth	2	Going places: - Time clauses - If - Hot verbs - In a hotel	9	Explanation, presentation of model and lecture	the exam, Quizzes, Reports, and activities in class

Tenth	2	Scared to death: - Verb patterns 2 - Manage to, used to - Ed/ing adjectives - Exclamations	10	Explanation, presentation of model and lecture	the exam, Quizzes, Reports, and activities in class
Eleventh	2	Things that changed the world: - Passives - Verbs and nouns that go together - Notices	11	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and activities in class
Twelfth	2	Dreams and reality: - Second conditional - Might - Phrasal verbs - Social expressions	12	Explanation, presentation of model and lecture	the exam, Quizzes, Reports, and activities in class
Thirteenth	2	Earning a living: - Present perfect continuous - Word formation	13	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and

		- Adverbs - Telephoning			activities in class
fourteenth	2	Family ties: - Past perfect - Reported statements - Saying goodbye	14	Explanation, presentation of model and lecture	the exam, Quizzes, Reports, and activities in class
Fifteenth	2	Reviewing	15	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and activities in class

371. Course Evaluation

1-Theoretical tests	35
2- Quizzes, Reports, and Class's Activities	15
4- Final exam	50

372. Learning and Teaching Resources

Required textbooks (curriculum books, if any)	Pre-Intermediate Student's Book: New Headway Plus (John and Liz Soars) Oxford University Press
Main references (sources)	
Recommended books and references (scientific journals, reports...)	
Electronic References Websites	Internet network

Course Description Form

373.	Course Name:
Computer applications 4	
374.	Course Code:
U. ۲۲۲.۲	
375.	Semester / Year:
Second / Second	
376.	Description Preparation Date:
1/9/2023	
377.	Available Attendance Forms:
Actual presence

Course Description Form

385.	Course Name:
Soil physics	
386.	Course Code:
.. ١٣٣٠١	
387.	Semester / Year:
First / THIRD	
388.	Description Preparation Date:
26\2\2024	
389.	Available Attendance Forms:
Actual presence	
390.	Number of Credit Hours (Total) / Number of Units (Total)
2 theoretical 2 practical units 3	
391.	Course administrator's name (mention all, if more than one name)
Name: Dr. AULA HUSSEIN ALI Email: Aula.alobeidi@mu.edu.iq	
392.	Course Objectives
Course Objectiv	1- Researches the study of soil physics and the physical properties of soil 2- Study how to measure the physical properties of soil

	3- Applying measurements of physical properties to solve scientific problems related to agriculture and the environment 4- Understanding the relationship between physical soil properties 5- Knowing the movement of water in the soil and the flow of water in saturated and unsaturated soils.
--	--

393. Teaching and Learning Strategies

Strategy	1-Explanation and clarification 2- Lecture method 3- Student groups 4- Practical lessons 5- Scientific trips 6 - Self-learning method
-----------------	--

394. Course Structure

Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
First	4	Introduction and definition of soil science, soil physics and some related relationships	Soil physics	Explanation, presentation of model and lecture	the exam
the second	4	Physical soil properties, soil texture, particle size distribution, and Stock's law	Soil physics	Explanation, presentation of model and lecture	the exam
the third	4	The specific area of soil science and methods for determining soil properties physically and chemically	Soil physics	Explanation, presentation of model and lecture	the exam
the fourth	4	Soil Structure: its definition, importance, and how to study it	Soil physics	Explanation, presentation of model and lecture	the exam
Fifth	4	Methods of studying soil structure and evidence of soil structure	Soil physics	Explanation, presentation of model and lecture	the exam
Sixth	4	Stability of soil aggregates, methods of studying them, and factors affecting the formation of aggregates	Soil physics	Explanation, presentation of model and lecture	the exam
Seventh	4	Soil water and general water properties, soil air, air capacity and gas exchange in the soil	Soil physics	Explanation, presentation of model and lecture	the exam
Eighth	4	Water properties related to porous media (soil), soil water energy and methods of expressing and measuring it	Soil physics	Explanation, presentation of model and lecture	the exam
Ninth	4	Soil temperature, soil temperature, and heat flow in the soil	Soil physics	Explanation, presentation of model and lecture	the exam

The tenth	4	Water flow in saturated soils and water flow in unsaturated soils	Soil physics	Explanation, presentation of model and lecture	the exam
Eleventh	4	Water infiltration in soils and methods for measuring it and equations	Soil physics	Explanation, presentation of model and lecture	the exam
Twelfth	4	Irrigation and drainage characteristics and the physical properties of surface soil	Soil physics	Explanation, presentation of model and lecture	the exam
Thirteenth	4	Water balance and energy balance in the field	Soil physics	Explanation, presentation of model and lecture	the exam
fourteenth	4	Evaluation of the water balance equation, water consumption and evapotranspiration	Soil physics	Explanation, presentation of model and lecture	the exam
Fifteenth	4		Soil physics	Explanation, presentation of model and lecture	the exam

395. Course Evaluation

1-Theoretical tests	25
2- Practical tests	15
3- Reports and studies	10
4- Final exam	50

396. Learning and Teaching Resources

Required textbooks (curriculum books, if any)	1- Soil Physics, written by Dr. Hisham Mahmoud Hassan 2000 2- Basics of soil physics, translation. Mahdi Ibrahim Odeh 1990
Main references (sources)	Basics of soil physics, translation. Mahdi Ibrahim Odeh 1990
Recommended books and references (scientific journals, reports...)	Iraqi academic scientific journals
Electronic Websites	Soil physics

Course Description Form

397.	Course Name:
Soil Chemistry	
398.	Course Code:
0013302	
399.	Semester / Year:
First Semester / Third	
400.	Description Preparation Date:
27/2/2024	
401.	Available Attendance Forms:

attend					
402. Number of Credit Hours (Total) / Number of Units (Total)					
hrs			3 units		
403. Course administrator's name (mention all, if more than one name)					
Name: Assistant Professor Dr. bashar mezher jader Email: bashar_mezher@mu.edu.iq					
404. Course Objectives					
Course Objectives			The soil chemistry course aims to explain the principles used in studying the chemical composition of soil. During this course, the student is introduced to all the chemical properties of soil and how to estimate and calculate them practically and in the field. During this course, the chemical properties of soil are linked to other branches of soil science		
405. Teaching and Learning Strategies					
Strategy	<ul style="list-style-type: none">• Make the learner active and effective in educational situations.• Teach students to respect different opinions and value others• Benefit from other people's ideas and information.				
406. Course Structure					
Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
first	○	The importance of studying soil chemistry,	Soil chemistry	Explanation, presentation of the model and lecture	Exam
the second	○	Ion exchange equations, physicochemical equations	Soil chemistry	Explanation, presentation of the model and lecture	Exam
the third	○	chemical equations soil anion exchange capacity	Soil chemistry	Explanation, presentation of the model and lecture	Exam
the fourth	○	Solubility balance soil	Soil chemistry	Explanation, presentation of the model and lecture	Exam
Fifth	○	Carbonate equilibrium, CO ₂ -H ₂ O system CaCO ₃ -H ₂ O-CO ₂ system in soil	Soil chemistry	Explanation, presentation of the model and lecture	Exam
Sixth	○	Phosphorus balance ionization phosphorus in soil	Soil chemistry	Explanation, presentation of the model and lecture	Exam

		phosphorus reactions			
Seventh	o	Chemical potential of ions in the soil solution	Soil chemistry	Explanation, presentation of the model and lecture	Exam
Eighth	o	phosphorus dissolution Soil acidity and alkalinity	Soil chemistry	Explanation, presentation of the model and lecture	Exam
Ninth	o	curves in the Al ₂ O ₃ -Fe ₂ O ₃ -CaO-P ₂ O ₅ -H ₂ O system	Soil chemistry	Explanation, presentation of the model and lecture	Exam
Tenth	o	the importance of studying the degree of soil reaction	Soil chemistry	Explanation, presentation of the model and lecture	Exam
Eleventh	o	sources of acidity in the soil, methods of measuring acidity and alkalinity	Soil chemistry	Explanation, presentation of the model and lecture	Exam
Twelfth	o	effect of the degree of reaction on cation exchange capacity.	Soil chemistry	Explanation, presentation of the model and lecture	Exam
Thirteenth	o	Equilibrium curves of soil buffering acidity	Soil chemistry	Explanation, presentation of the model and lecture	Exam
Fourteenth	o	alkalinity of soils in dry and semi-arid areas, calcareous soils, and gypsum soils.	Soil chemistry	Explanation, presentation of the model and lecture	Exam

407. Course Evaluation

Distributing the score out of 100 according to the tasks assigned to the student such as daily preparation, daily oral, monthly, or written exams, reports etc

408. Learning and Teaching Resources

Required textbooks (curricular books if any)	Soil chemistry
Main references (sources)	Books related to the subject and scientific research
Recommended books and references (scientific journals, reports...)	
Electronic References, Websites	https://onlinelibrary.wiley.com/doi/full/10.1002/9781119300762.wsts0025

Course Description Form

409. Course Name:					
Soil fertility					
410. Course Code:					
..١٣٣.٣					
411. Semester / Year:					
First / Third					
412. Description Preparation Date:					
27\2\2024					
413. Available Attendance Forms:					
Actual presence					
414. Number of Credit Hours (Total) / Number of Units (Total)					
60 hrs units 3					
415. Course administrator's name (mention all, if more than one name)					
Name: Prof. Dr. Raheem alwan halool					
Email: Rahim_alwan@mu.edu.iq					
416. Course Objectives					
Course Objectiv	<ul style="list-style-type: none"> The student gets to know the science of soil fertility The student should classify the types of elements and their importance to plants The student should detail the factors affecting nutrient readiness The student will be familiar with soil fertility evaluation The student should evaluate the soil elements according to their importance to plants 				
417. Teaching and Learning Strategies					
Strategy	1-Explanation and clarification 2- Lecture method 3- Student groups 4- Practical lessons 5- Scientific trips 6 - Self-learning method				
418.Course Structure					
Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
First	5	The student gets to know growth and the factors affecting it	Fertilizer technology	Explanation, presentation the model a lecture	the exam

the second	5	The student gets to know the types of nutrients	Fertilizer technology	Explanation, presentation the model and lecture	the exam
the third	5	The student recognizes the movement and absorption of elements in the soil	Fertilizer technology	Explanation, presentation the model and lecture	the exam
the fourth	5	The student gets to know the types of elements in the soil	Fertilizer technology	Explanation, presentation the model and lecture	the exam
Fifth	5	The student gets to know the necessary elements	Fertilizer technology	Explanation, presentation the model and lecture	the exam
Sixth	5	The student gets to know the major elements	Fertilizer technology	Explanation, presentation the model and lecture	the exam
Seventh	5	The student gets to know the small elements	Fertilizer technology	Explanation, presentation the model and lecture	the exam
Eighth	5	The student gets to know the useful and encouraging elements for growth	Fertilizer technology	Explanation, presentation the model and lecture	the exam
Ninth	5	For the student to recognize the distinction between elements	Fertilizer technology	Explanation, presentation the model and lecture	the exam
The tenth	5	For the student to get to know Factors affecting the readiness of elements	Fertilizer technology	Explanation, presentation the model and lecture	the exam
Eleventh	5	The student gets to know nitrogen and its factors	Fertilizer technology	Explanation, presentation the model and lecture	the exam
Twelfth	5	The student gets to know phosphorus and potassium and their factors	Fertilizer technology	Explanation, presentation the model and lecture	the exam
Thirteenth	5	The student gets to know sulfur, calcium, magnesium, and trace elements	Fertilizer technology	Explanation, presentation the model and lecture	the exam
fourteenth	5	The student will be familiar with the evaluation of soil fertility	Fertilizer technology	Explanation, presentation the model and lecture	the exam
Fifteenth	5	The student will be familiar with organic matter	Fertilizer technology	Explanation, presentation	the exam

				the model a	
				lecture

Course Description Form

421.	Course Name:
	Irrigation
422.	Course Code:
	...١٣٣٠٤
423.	Semester / Year:
	First semester / THIRD
424.	Description Preparation Date:
	1/9/2023
425.	Available Attendance Forms:
	Actual presence
426.	Number of Credit Hours (Total) / Number of Units (Total)
	2 theoretical 2 practical units 3
427.	Course administrator's name (mention all, if more than one name)
	Name: Dr. AULA HUSSEIN ALI Email: Aula.alobeidi@mu.edu.iq
428.	Course Objectives
Course Objectives	1-It discusses irrigation, the science of irrigation, the tasks of each of them, the sources of irrigation, methods of controlling it, and exploiting water resources 2- Researches how to design, plan and implement irrigation facilities 3-Studies how to calculate plant water needs and water consumption. 4- Apply and calculate irrigation efficiency, irrigation interval, and irrigation water depth 5-Study measuring water using different methods

	6-Knowledge of traditional irrigation methods and modern irrigation methods and the difference between them.				
429. Teaching and Learning Strategies					
Strategy	1-Explanation and clarification 2- Lecture method 3- Student groups 4- Practical lessons 5- Scientific trips 6 - Self-learning method				
430.Course Structure					
Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
first	4	The concept of irrigation, irrigation in ancient and modern times	Irrigation	Explanation, presentation of model and lecture	the exam
the second	4	Irrigation water sources, irrigation water quality	Irrigation	Explanation, presentation of model and lecture	the exam
the third	4	Soil physical properties associated with irrigation	Irrigation	Explanation, presentation of model and lecture	the exam
the fourth	4	The relationship of water with soil, moisture constants, movement of water in the soil, water flow	Irrigation	Explanation, presentation of model and lecture	the exam
Fifth	4	Water measurement	Irrigation	Explanation, presentation of model and lecture	the exam
Sixth	4	Plant water consumption	Irrigation	Explanation, presentation of model and lecture	the exam
Seventh	4	Water requirements and irrigation scheduling	Irrigation	Explanation, presentation of model and lecture	the exam
Eighth	4	Transport and distribution of irrigation water, movement of water in pipes and open channels	Irrigation	Explanation, presentation of model and lecture	the exam
Ninth	4	Design of soil and lined irrigation channels	Irrigation	Explanation, presentation of model and lecture	the exam
The tenth	4	Efficiency, adequacy and consistency of irrigation	Irrigation	Explanation, presentation of model and lecture	the exam

Eleventh	4	Traditional irrigation methods	Irrigation	Explanation, presentation of model and lecture	the exam
Twelfth	4	Modern irrigation methods	Irrigation	Explanation, presentation of model and lecture	the exam
Thirteenth	4	Modern irrigation methods rationalization of water use	Irrigation	Explanation, presentation of model and lecture	the exam
fourteenth	4	Pumping water and how to calculate pump capacity	Irrigation	Explanation, presentation of model and lecture	the exam
Fifteenth	4		Irrigation	Explanation, presentation of model and lecture	the exam

431. Course Evaluation

1-Theoretical tests	25
2- Practical tests	15
3- Reports and studies	10
4- Final exam	50

432. Learning and Teaching Resources

Required textbooks (curriculum books, if any)	<p>1-Irrigation, its basics and applications, written by Dr. Nabil Ibrahim Al-Tayef and Dr. Issam Khudair Hamza Al-Hadithi 1988 Ministry of Higher Education and Scientific Research - University of Baghdad.</p> <p>2-Irrigation and drainage, written by Dr. Laith Khalil Ismail 2000 Ministry of Higher Education and Scientific Research - University of Mosul</p> <p>3- Modern irrigation technologies and other topics in the water issue, written by Dr. Issam Khudair Al-Hadithi, Dr. Ahmad Madloul Al-Kubaisi, and Dr. Yas Khudair Hamza Al-Hadithi 2010, Ministry of Higher Education and Scientific Research - Anbar University</p>
Main references (sources)	<p>1- drainage (investigations, designs, implementation and maintenance). Dr. Mohsen Muhareb Awad Al-Lami and Dr. Al Saleh Abdul-Jabbar Al-Janabi. Iraq . Ministry of Higher Education and Scientific Research. University of Al Mosul .</p> <p>2- Modern irrigation technologies and other topics in the water issue, written by Dr. Issam Khudair Al-Hadithi, Dr. Ahmad Madloul Al-Kubaisi, and Dr. Yas Khudair Hamza Al-Hadithi 2010, Ministry of Higher Education and Scientific Research - Anbar University</p>

463. Course administrator's name (mention all, if more than one name)					
Name: Lecturer Dr. Mohammed Abdulridha Naser Email : mohammed.naser@mu.edu.iq					
464. Course Objectives					
Course Objectiv	<ul style="list-style-type: none">• To introduce the student to the concept of soil and water pollution• To introduce the student to the ecosystem and its types.• Introducing the student to pollution - its causes and sources• The student will learn about the cycles of elements and their impact on environment pollution, then learn about water pollution, including surface and groundwater pollution.• To learn about bacterial and viral water pollution, industrial water pollutants and behavior of pesticides in the aquatic environment.• To learn about bacterial and viral water pollution, industrial water pollutants and behavior of pesticides in the aquatic environment.				
465. Teaching and Learning Strategies					
Strategy	1-Explanation and clarification 2- Lecture method 3- Student groups 4- Practical lessons 5- Scientific trips 6 - Self-learning method				
466.Course Structure					
Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
first	4	The student gets to know ecosystem and the definition of pollution, its causes and sources	Soil and water pollution	Explanation, presentation of model and lecture	the exam
the second	4	The student will be familiar with the cycles of elements (nitrogen, phosphorus, oxygen, carbon, and sulfur)	Soil and water pollution	Explanation, presentation of model and lecture	the exam
the third	4	The student will learn about surface and groundwater pollution and seawater pollution.	Soil and water pollution	Explanation, presentation of model and lecture	the exam
the fourth	4	The student will learn about bacterial, viral, and water pollution in water.	Soil and water pollution	Explanation, presentation of model and lecture	the exam

Fifth	4	The student will be familiar with industrial water pollution, battery factories, and fertilizer factories.	Soil and water pollution	Explanation, presentation of model and lecture	the exam
Sixth	4	The student gets to know behavior of pesticides in aquatic environment, and behavior of pesticides on living organisms.	Soil and water pollution	Explanation, presentation of model and lecture	the exam
Seventh	4	The student will learn about biological pollution, sewage waste, and fertilization behavior in water pollution	Soil and water pollution	Explanation, presentation of model and lecture	the exam
Eighth	4	The student will be familiar with the division of water according to its suitability for different uses	Soil and water pollution	Explanation, presentation of model and lecture	the exam
Ninth	4	The student gets to know biological soil pollution	Soil and water pollution	Explanation, presentation of model and lecture	the exam
The tenth	4	The student will learn about soil contamination with pesticides, the behavior of pesticides	Soil and water pollution	Explanation, presentation of model and lecture	the exam
Eleventh	4	different types of soil, and biodegradation of pesticides in the soil	Soil and water pollution	Explanation, presentation of model and lecture	the exam
Twelfth	4	The student will learn about chemical and natural control of pesticides in the soil and their absorption by plants.	Soil and water pollution	Explanation, presentation of model and lecture	the exam
Thirteenth	4	The student will learn about global warming, ozone layer erosion, thermal pollution, and Radiological.	Soil and water pollution	Explanation, presentation of model and lecture	the exam
fourteenth	4		Soil and water pollution	Explanation, presentation of model and lecture	the exam
Fifteenth	4		Soil and water pollution	Explanation, presentation of model and lecture	the exam

467. Course Evaluation

1-Theoretical tests	25
2- Practical tests	15
3- Reports and studies	10
4- Final exam	50

468. Learning and Teaching Resources

Required textbooks (curriculum books, if any)	Environmental pollution, Prof. Dr. Fali Hassan - Prof. Dr. Bah Abdel-Jabbar
Main references (sources)	Environmental Pollution Dr. Muhammad Ammar Al-Rawi 198
Recommended books and references (scientific journals, reports...)	Iraqi academic scientific journals

Electronic Websites	Referenc	Soil Science Society Of America Internet network

Course Description Form

469.	Course Name:
English Language	
470.	Course Code:
U. ١٣٣. ١	
471.	Semester / Year:
first semester / The third	
472.	Description Preparation Date:
1/9/2023	
473.	Available Attendance Forms:
Actual presence	
474.	Number of Credit Hours (Total) / Number of Units (Total)
theoretical 2 practical units 1	
475.	Course administrator's name (mention all, if more than one name)
Name: Asst.prof. Dr. Ahmed Merza Abood Email : ahmedme@mu.edu.iq	
476.	Course Objectives
Course Objectiv	- Teaching students, the basic concepts related to access to the simple basics of an introduction the English language for students of the College of Agriculture. - The student gets to know the concept of the English language. - Enabling students to know how to deal with the English language
477.	Teaching and Learning Strategies
Strategy	1-Explanation and clarification 2- Lecture method 3- Student groups 4- Practical lessons 5- Scientific trips

6 - Self-learning method

478. Course Structure

Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
First	2	It's a wonderful world: - Tenses - Auxiliary verbs - Short answers - What's in a word? - Social expressions	1	Explanation, presentation of model and lecture	the exam, Quizzes, Reports, and activities in class
the second	2	Get happy! - Simple or continuous? - Passive - Sport - Numbers and dates	2	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and activities in class
the third	2	Telling tales: - Past tenses - Passive - Art and literature - Giving opinions	3	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and activities in class
the fourth	2	Doing the right thing: - Modal verbs 1 - Obligation and permission - Nationality words - Requests and offers	4	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and activities in class
Fifth	2	On the move: - Future forms - The weather - Travelling	5	Explanation, presentation of model and lecture	the exam, Quizzes, Reports, and activities in class
Sixth	2	I just love it: - Like - Verb patterns - Describing food, towns, and people - Signs and sounds	6	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and activities in class
Seventh	2	The world of work: - Present perfect active and passive - Phrasal verbs - On the phone	7	Explanation, presentation of model and lecture	the exam, Quizzes, Reports, and activities in class
Eighth	2	Just imagine! - Conditionals - Time clauses - Base and strong adjectives - Making suggestions	8	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and activities in class

Ninth	2	Getting on together: - Modal verbs 2 - Probability - Character adjectives - So do I! Neither do I!	9	Explanation, presentation of model and lecture	the exam, Quizzes, Reports, and activities in class
-------	---	--	---	--	--

Tenth	2	Obsessions: - Present perfect continuous - Time expressions - Compound nouns - Quantity	10	Explanation, presentation of model and lecture	the exam, Quizzes, Reports, and activities in class
-------	---	---	----	--	--

Eleventh	2	Tell me about it! - Indirect questions - Question tags - The body - Informal English	11	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and activities in class
----------	---	--	----	--	--

Twelfth	2	Life's great events! - Reported speech - Reporting verbs - Birth, marriage, and death - Saying sorry	12	Explanation, presentation of model and lecture	the exam, Quizzes, Reports, and activities in class
---------	---	--	----	--	--

Thirteenth	2	Writing: - Correcting mistakes 1 - Letters and emails - A narrative 1 - For and against - Making a reservation - A description 1 - A letter of Application - A narrative 2 - A description 2 - Writing a biography - Words that join ideas - Correcting mistakes 2	1-12	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and activities in class
------------	---	--	------	--	--

fourteenth	2	Pairwork activities: - Practice - Vocabulary - Reading and speaking - Problems	1-12	Explanation, presentation of model and lecture	the exam, Quizzes, Reports, and activities in class
------------	---	--	------	--	--

Fifteenth	2	Reviewing	1-12	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and activities in class
-----------	---	-----------	------	--	--

479. Course Evaluation

1-Theoretical tests	35
2- Quizzes, Reports, and Class's Activities	15
4- Final exam	50

480. Learning and Teaching Resources

Required textbooks (curriculum books, if any)	Intermediate Student's Book: New Headway Plus (John and Soars) Oxford University Press
---	--

Main references (sources)	
Recommended books and references (scientific journals, reports...)	
Electronic References Websites	Internet network

Course Description Form

481. Course Name:	Natural resource economics
482. Course Code:	0C23301
483. Semester / Year:	Second/third
484. Description Preparation Date:	26/2/2024
485. Available Attendance Forms:	Actual attendant
486. Number of Credit Hours (Total) / Number of Units (Total)	60 hrs , 2 units
487. Course administrator's name (mention all, if more than one name)	Name: assistant prof. Dr. sadeq Hadi Hussein Email: Sadeq.hadi@mu.edu.iq
488. Course Objectives	<div>Course Objectives</div> <div> 1- Increase knowledge of natural resource economics. 2- Optimal exploitation of natural resources as they are viable resources 3- Teaching students the importance of natural resources and their role in the economic development of the country </div>

			Developing the student’s ability to make people aware that natural resources belong to future generations as well as their current		
489. Teaching and Learning Strategies					
Strategy		<div>- Active participation in the classroom</div> <div>-Rapid exams</div> <div>-Monthly tests are proof of understanding the lecture</div>			
490.Course Structure					
Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
1	2	Natural resource economics	1- Natural resource economics	Theoretical lecture	Theoretical exam
2	2		2- Land economics		Theoretical exam
3	2		3- Oil		Theoretical exam
4	2		4- Water resources		Theoretical exam
5	2	Natural resource economics	5- Human resources	Theoretical lecture	Theoretical exam
6	2		6- Environment		Theoretical exam
7	2		7- Public goods and external factors		
8	2		Natural resource economics		8- General expenses
9	2	9- Public revenues		Theoretical exam	

10	2	Natural resource economics	10- Preserving natural resources	Theoretical lecture	Theoretical exam
11	2		11- Sources of environmental pollution		Theoretical exam
12	2	Natural resource economics	12- Means of preserving natural resources	Theoretical lecture	Theoretical exam
					Theoretical exam

491. Course Evaluation

Distribution of the grade out of 100 according to the tasks assigned to the student, such as daily preparation, daily, oral, monthly, written exams, reports, etc.

492. Learning and Teaching Resources

Required textbooks (curricular books, if any)	Natural Resource Economics - Hassoun Muhammad Ali Economics of Animal Production - Salem Tawfiq Al-Najafi - Mosul Press
Main references (sources)	
Recommended books and references (scientific journals, reports...)	
Electronic References, Websites	

Course Description Form

493.	Course Name:				
Drainage					
494.	Course Code:				
.. ٢٣٣٠١					
495.	Semester / Year:				
Second / THIRD					
496.	Description Preparation Date:				
26\2\2024					
497.	Available Attendance Forms:				
Actual presence					
498.	Number of Credit Hours (Total) / Number of Units (Total)				
2 theoretical 2 practical units 3					
499.	Course administrator's name (mention all, if more than one name)				
Name: Dr. AULA HUSSEIN ALI Email: Aula.alobeidi@mu.edu.iq					
500.	Course Objectives				
Course Objectiv	<p>It examines the concept of drainage, the types of drains, the basic purpose of their construction and the characteristics of the soil related to drainage</p> <p>The relationship of drainage to plant growth and productivity, as well as the patterns distribution of drains networks and the requirements for implementing sewers.</p> <p>Mechanization and maintenance of drains of all kinds.</p>				
501.	Teaching and Learning Strategies				
Strategy	<p>1-Explanation and clarification</p> <p>2- Lecture method</p> <p>3- Student groups</p> <p>4- Practical lessons</p> <p>5- Scientific trips</p> <p>6 - Self-learning method</p>				
502. Course Structure					
Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
First	4	The concept of drainage, the purpose of constructing drains, the relationship of drainage to plant growth and productivity	drainage	Explanation, presentation of model and lecture	the exam
the second	4	Physical soil properties related to drainage	drainage	Explanation, presentation of model and lecture	the exam

the third	4	The hydrological cycle and the local conditions of irrigation and drainage therein	drainage	Explanation, presentation of model and lecture	the exam
the fourth	4	Drainage, soil salinity, leaching requirements and salt balance	drainage	Explanation, presentation of model and lecture	the exam
Fifth	4	Investigations required to establish drains	drainage	Explanation, presentation of model and lecture	the exam
Sixth	4	Water flow in the soil and its relation to the concept of drainage. Analysis of flow	drainage	Explanation, presentation of model and lecture	the exam
Seventh	4	Measurement of saturated water conductivity	drainage	Explanation, presentation of model and lecture	the exam
Eighth	4	Types of drains, their classification, the objectives of their establishment	drainage	Explanation, presentation of model and lecture	the exam
Ninth	4	Open drains and covered drains	drainage	Explanation, presentation of model and lecture	the exam
The tenth	4	Incised and vertical drains and design of drains systems	drainage	Explanation, presentation of model and lecture	the exam
Eleventh	4	drain network distribution patterns	drainage	Explanation, presentation of model and lecture	the exam
Twelfth	4	Mechanization of drains and supplies for implementing drains	drainage	Explanation, presentation of model and lecture	the exam
Thirteenth	4	Maintenance of covered drains, methods of cleaning them, causes of malfunctioning and processing in the drain system	drainage	Explanation, presentation of model and lecture	the exam
fourteenth	4	Maintenance of open drains	drainage	Explanation, presentation of model and lecture	the exam
Fifteenth	4	Designs of open and covered drains systems and calculation of distance between drains	drainage	Explanation, presentation of model and lecture	the exam

503. Course Evaluation

1-Theoretical tests	25
2- Practical tests	15
3- Reports and studies	10
4- Final exam	50

504. Learning and Teaching Resources

Required textbooks (curriculum books, if any)	Drainage (investigations, designs, implementation and maintenance). Dr. Mohsen Muhareb Awad Al-Lami and Dr. Ali Saleh Abdul-Jabbar Al-Janabi. Iraq . Ministry of Higher Education and Scientific Research. University of Al Mosul .
Main references (sources)	Field drainage engineering

Recommended books and references (scientific journals, reports...)	Iraqi academic scientific journals

Course Description Form

505.	Course Name:
Soil minerals	
506.	Course Code:
.. ٢٣٣.2	
507.	Semester / Year:
First / THIRD	
508.	Description Preparation Date:
26\2\2024	
509.	Available Attendance Forms:
Actual presence	
510.	Number of Credit Hours (Total) / Number of Units (Total)
2 theoretical 2 practical units 3	
511.	Course administrator's name (mention all, if more than one name)
Name: Assistant Prof. Ahmed Kazem Fazza Email: Ahmad.kadhem@mu.edu.iq	
512.	Course Objectives
Course Objectiv	<ul style="list-style-type: none"> • For the student to become familiar with the science of metallurgy • The student should classify soil minerals and methods for distinguishing them • The student should separate the negative and positive effect of minerals on the soil • The student gets to know the depth of the soil and discover it • The student will be able to manage soil according to mineral content
513.	Teaching and Learning Strategies
Strategy	1-Explanation and clarification 2- Lecture method 3- Student groups 4- Practical lessons 5- Scientific trips 6 - Self-learning method

514.Course Structure					
Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
First	4	The student gets to know the concept of metals	Soil minerals	Explanation, presentation of model and lecture	the exam
the second	4	For the student to know the source of salts	Soil minerals	Explanation, presentation of model and lecture	the exam
the third	4	The student will be familiar with methods of diagnosing minerals	Soil minerals	Explanation, presentation of model and lecture	the exam
the fourth	4	The student gets to know the types of soil minerals	Soil minerals	Explanation, presentation of model and lecture	the exam
Fifth	4	The student gets to know the behavior of soil minerals	Soil minerals	Explanation, presentation of model and lecture	the exam
Sixth	4	For the student to become familiar with the relevant education section	Soil minerals	Explanation, presentation of model and lecture	the exam
Seventh	4	The student gets to know the characteristics of soil minerals	Soil minerals	Explanation, presentation of model and lecture	the exam
Eighth	4	The student will be familiar with metal swelling and shrinkage	Soil minerals	Explanation, presentation of model and lecture	the exam
Ninth	4	For the student to know the effect of minerals on fertility	Soil minerals	Explanation, presentation of model and lecture	the exam
The tenth	4	The student will be familiar with factors determining the quality of irrigation water and the indicators used to determine the quality of irrigation water	Soil minerals	Explanation, presentation of model and lecture	the exam
Eleventh	4	The student will recognize expansion and contracting of metals	Soil minerals	Explanation, presentation of model and lecture	the exam
Twelfth	4	The student will learn how to deal with minerals that affect soil properties	Soil minerals	Explanation, presentation of model and lecture	the exam
Thirteenth	4	For the student to become familiar with the problems of limestone soils	Soil minerals	Explanation, presentation of model and lecture	the exam
fourteenth	4		Soil minerals	Explanation, presentation of model and lecture	the exam
Fifteenth	4		Soil minerals	Explanation, presentation of model and lecture	the exam

515. Course Evaluation	
1-Theoretical tests	25
2- Practical tests	15
3- Reports and studies	10
4- Final exam	50
516. Learning and Teaching Resources	
Required textbooks (curriculum books, if any)	1- Soil minerals : prof. Dr. Salman Issa 2-Lectures
Main references (sources)	
Recommended books and references (scientific journals, reports...)	Iraqi academic scientific journals
Electronic Websites	Soil minerals

Course Description Form

517.	Course Name:
	remote sensing
518.	Course Code:
	0C23302
519.	Semester / Year:
	Second semester/ THIRD
520.	Description Preparation Date:
	26\2\2024
521.	Available Attendance Forms:
	Actual presence
522.	Number of Credit Hours (Total) / Number of Units (Total)
	2 theoretical 2 practical units 3
523.	Course administrator's name (mention all, if more than one name)
	Name: Dr. AULA HUSSEIN ALI Email: Aula.alobeidi@mu.edu.iq
524.	Course Objectives
Course Objectiv	1- It examines the concept of remote sensing, and the elements and applications of remote sensing 2- Researches the interactions of electromagnetic energy and spectral reflectivity and the factors affecting them 3- Knowing the sensors, their types and characteristics, as well as examining aerial and satellite images 4- Studying methods for classifying satellite images

		5- The student's knowledge of geographic information systems (GIS) and their uses			
525. Teaching and Learning Strategies					
Strategy		1-Explanation and clarification 2- Lecture method 3- Student groups 4- Practical lessons 5- Scientific trips 6 - Self-learning method			
526.Course Structure					
Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
First	4	History and target of remote sensing	remote sensing	Explanation, presentation of model and lecture	the exam
the second	4	Electromagnetic energy and parts of the electromagnetic spectrum	remote sensing	Explanation, presentation of model and lecture	the exam
the third	4	Energy interaction with environmental components	remote sensing	Explanation, presentation of model and lecture	the exam
the fourth	4	Spectral reflectivity and factors affecting it	remote sensing	Explanation, presentation of model and lecture	the exam
Fifth	4	Aerial photography and its stages of development	remote sensing	Explanation, presentation of model and lecture	the exam
Sixth	4	Types of aerial photographs and their characteristics	remote sensing	Explanation, presentation of model and lecture	the exam
Seventh	4	Rules for classifying aerial photographs	remote sensing	Explanation, presentation of model and lecture	the exam
Eighth	4	Types of characteristics of satellite platforms	remote sensing	Explanation, presentation of model and lecture	the exam
Ninth	4	Types and characteristics of sensors	remote sensing	Explanation, presentation of model and lecture	the exam
The tenth	4	Types and properties of satellite data	remote sensing	Explanation, presentation of model and lecture	the exam
Eleventh	4	Satellite data sensing	remote sensing	Explanation, presentation of model and lecture	the exam

Twelfth	4	Methods of classifying satellite images	remote sensing	Explanation, presentation of model and lecture	the exam
Thirteenth	4	Remote sensing applications	remote sensing	Explanation, presentation of model and lecture	the exam
fourteenth	4	Geographic information systems	remote sensing	Explanation, presentation of model and lecture	the exam
Fifteenth	4		remote sensing	Explanation, presentation of model and lecture	the exam

527. Course Evaluation

1-Theoretical tests	25
2- Practical tests	15
3- Reports and studies	10
4- Final exam	50

528. Learning and Teaching Resources

Required textbooks (curriculum books, if any)	Remote sensing science: Prof. Dr. Ahmed Saleh Al-Mashhadani, M.D. Ahmed Madloul. 2014.
Main references (sources)	Basics of remote sensing (Canada center for remote sensing)
Recommended books and references (scientific journals, reports...)	Iraqi academic scientific journals
Electronic Websites	Google earth ,USGS

Course Description Form

529.	Course Name:	
Soil Salinity		
530.	Course Code:	
...٢٣٣.٣		
531.	Semester / Year:	
Second / third		
532.	Description Preparation Date:	
26\2\2024		
533.	Available Attendance Forms:	
Actual presence		
534.	Number of Credit Hours (Total) / Number of Units (Total)	
2 theoretical 3 practical units 3		
535.	Course administrator's name (mention all, if more than one name)	
Name: Prof. Dr. Ghanem. B. Noni		

536. Course Objectives

Course Objectiv	<ul style="list-style-type: none"> • The student gets to know the concept of saline soils • For the student to know the sources of salts • The student gets to know the classification and types of fertilizers and their importance • • For the student to learn about methods of adding fertilizers • • The student should separate the positive and negative aspects of fertilizer and its harm to plants • • For the student to recognize pollution from chemical fertilizers •
------------------------	--

537. Teaching and Learning Strategies

Strategy	1-Explanation and clarification 2- Lecture method 3- Student groups 4- Practical lessons 5- Scientific trips 6 - Self-learning method
-----------------	--

538. Course Structure

Week	Hr s	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
First	○	The student gets to know the concept of saline soils	Soil Salinity	Explanation, presentation of model and lecture	the exam
the second	○	For the student to know the sources of salts	Soil Salinity	Explanation, presentation of model and lecture	the exam
the third	○	The student will be familiar with the means of transporting salts	Soil Salinity	Explanation, presentation of model and lecture	the exam
the fourth	○	The student will be familiar with the stages of soil salinization	Soil Salinity	Explanation, presentation of model and lecture	the exam
Fifth	○	The student will be familiar with the conditions of soil salinization	Soil Salinity	Explanation, presentation of model and lecture	the exam
Sixth	○	student gets to know the types of saline and sodic soils	Soil Salinity	Explanation, presentation of model and lecture	the exam

Seventh	o	For the student to recognize the aspects the effect of salinity on plant growth	Soil Salinity	Explanation, presentation of model and lecture	the exam
Eighth	o	The student will be familiar with the indicators for determining the effect of salinity	Soil Salinity	Explanation, presentation of model and lecture	the exam
Ninth	o	The student will be familiar with the means of increasing the ability of plants tolerate salinity	Soil Salinity	Explanation, presentation of model and lecture	the exam
The tenth	o	The student will be familiar with the factors determining the quality of irrigation water and the indicators used determine the quality of irrigation water	Soil Salinity	Explanation, presentation of model and lecture	the exam
Eleventh	o	The student will be familiar with irrigation water classification systems	Soil Salinity	Explanation, presentation of model and lecture	the exam
Twelfth	o	The student will learn how to live with salinity	Soil Salinity	Explanation, presentation of model and lecture	the exam
Thirteenth	o	For the student to become familiar with the problems of limestone soils	Soil Salinity	Explanation, presentation of model and lecture	the exam
fourteenth	o	The student will be familiar with the means of increasing the ability of plants tolerate salinity	Soil Salinity	Explanation, presentation of model and lecture	the exam
Fifteenth	o		Soil Salinity	Explanation, presentation of model and lecture	the exam

539. Course Evaluation

1-Theoretical tests	25
2- Practical tests	15
3- Reports and studies	10
4- Final exam	50

540. Learning and Teaching Resources

Required textbooks (curriculum books, if any)	1- Soil salinity. 2012. Dr. Haider Ai-Zoubedi. 2-Lectures
Main references (sources)	
Recommended books and references (scientific journals, reports...)	Iraqi academic scientific journals
Electronic Websites	Soil Science Society Of America Library Genesis

Course Description Form

541.	Course Name:	
Soil Organic Matter		
542.	Course Code:	
0023304		
543.	Semester / Year:	
First semester / Third		
544.	Description Preparation Date:	
26\2\2024		
545.	Available Attendance Forms:	
Actual presence		
546.	Number of Credit Hours (Total) / Number of Units (Total)	
30 theoretical 45 practical units 3.5		
547.	Course administrator's name (mention all, if more than one name)	
Name: Lecturer Dr. Mohammed Abdulridha Naser Email : mohammed.naser@mu.edu.iq		
548.	Course Objectives	
Course Objectiv	<ul style="list-style-type: none"> • Teaching students the basic concepts related to organic matter in the soil and understand its role in various environmental systems, including agricultural ones, forests, marshes, and swamps. • Estimating the percentage of organic matter in the soil using various laboratory methods, estimating it in the field and then expressing it quantitatively in kilograms or tons per hectare • Drawing a relative score for the organic carbon balance between the soil and its external surroundings. • Describe how carbon and nitrogen move under the influence of current agricultural methods and the impact of sudden, severe changes such as fires, droughts, and floods. • Measuring the ability of the soil in the short and long term to recover and perform its function by knowing the level of microbial mass, the ratio of carbon to nitrogen, and the nature of organic matter, • Realizing the agricultural and environmental value of organic matter, • To contribute to improving the general management of organic matter in the soil. 	
549.	Teaching and Learning Strategies	
Strategy	1-Explanation and clarification 2- Lecture method 3- Student groups 4- Practical lessons 5- Scientific trips 6 - Self-learning method	

550.Course Structure					
Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
first	4	Sources of organic matter in soil	Soil Organic Matter	Explanation, presentation of model and lecture	the exam
the second	4	Humus, its origin, definition and properties	Soil Organic Matter	Explanation, presentation of model and lecture	the exam
the third	4	Components of plant waste	Soil Organic Matter	Explanation, presentation of model and lecture	the exam
the fourth	4	Decomposition of organic compounds and formation of humus	Soil Organic Matter	Explanation, presentation of model and lecture	the exam
Fifth	4	Simple organic compounds resulting from the decomposition of organic matter	Soil Organic Matter	Explanation, presentation of model and lecture	the exam
Sixth	4	Carbon cycle in nature	Soil Organic Matter	Explanation, presentation of model and lecture	the exam
Seventh	4	Organic compounds containing nitrogen and their mineralization	Soil Organic Matter	Explanation, presentation of model and lecture	the exam
Eighth	4	Organic compounds containing phosphorus and their mineralization	Soil Organic Matter	Explanation, presentation of model and lecture	the exam
Ninth	4	Sulfur-containing organic compounds and their mineralization	Soil Organic Matter	Explanation, presentation of model and lecture	the exam

The tenth	4	Effect of climate and vegetation on soil organic matter content	Soil Organic Matter	Explanation, presentation of model and lecture	the exam
Eleventh	4	Changes in organic matter in agriculture and the direct effect of organic compounds on higher plants	Soil Organic Matter	Explanation, presentation of model and lecture	the exam
Twelfth	4	The effect of organic matter on soil properties and the relationship between them	Soil Organic Matter	Explanation, presentation of model and lecture	the exam
Thirteenth	4	The C:N ratio, its importance and value in some plants and organisms	Soil Organic Matter	Explanation, presentation of model and lecture	the exam
fourteenth	4	The amount of organic matter and nitrogen in the soil and Some characteristics of organic soil	Soil Organic Matter	Explanation, presentation of model and lecture	the exam
Fifteenth	4	Liquid organic fertilizers	Soil Organic Matter	Explanation, presentation of model and lecture	the exam

551. Course Evaluation	
1-Theoretical tests	25
2- Practical tests	15
3- Reports and studies	10
4- Final exam	50
552. Learning and Teaching Resources	
Required textbooks (curriculum books, if any)	Soil organic matter and organic manure Prepared by: Nour El-Din Shawqi Abdel-Wahab Abdel-Razzaq and Qahtan Jamal
Main references (sources)	1. Soil Organic Matter in Sustainable Agriculture (Advances in Agroecology) by Fred Madoff and Ray R. Weil (May 27, 2004). CRC Press; 1 edition. 416 pages. 1- Carbon 2. Course Description Form

553.	Course Name:		
Soil survey and classification			
554.	Course Code:		
013401			
555.	Semester / Year:		
First / Fourth			
556.	Description Preparation Date:		
26\2\2024			
557.	Available Attendance Forms:		
Actual presence			
558.	Number of Credit Hours (Total) / Number of Units (Total)		
2 theoretical 2 practical units 3			
559.	Course administrator's name (mention all, if more than one name)		
Name: Assistant Prof. Ahmed Kazem Fazza Email: Ahmad.kadhem@mu.edu.iq			
560.	Course Objectives		
Course Objectiv	<ul style="list-style-type: none"> • For the student to become familiar with the science of surveying and classification • The student should classify all types of soil • That the student can distinguish soil • The student gets to know the types of classifications in the world 		

	• The student will be able to manage soil according to its characteristics				
561. Teaching and Learning Strategies					
Strategy	1-Explanation and clarification 2- Lecture method 3- Student groups 4- Practical lessons 5- Scientific trips 6 - Self-learning method				
562. Course Structure					
Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
First	4	The student gets to know the concept of surveying and classification	Soil survey and classification	Explanation, presentation of model and lecture	the exam
the second	4	The student gets to know the types of international categories	Soil survey and classification	Explanation, presentation of model and lecture	the exam
the third	4	For the student to become familiar with classification methods.	Soil survey and classification	Explanation, presentation of model and lecture	the exam
the fourth	4	The student will be familiar with stages of soil classification	Soil survey and classification	Explanation, presentation of model and lecture	the exam
Fifth	4	The student will learn how to conduct soil mineral surveys	Soil survey and classification	Explanation, presentation of model and lecture	the exam
Sixth	4	The student will know how to prepare soil maps.	Soil survey and classification	Explanation, presentation of model and lecture	the exam
Seventh	4	For the student to become familiar with the classification of land uses.	Soil survey and classification	Explanation, presentation of model and lecture	the exam
Eighth	4	The student will be familiar with drawing and preparing soil maps.	Soil survey and classification	Explanation, presentation of model and lecture	the exam
Ninth	4	For the student to become familiar with the modern American system of soil classification.	Soil survey and classification	Explanation, presentation of model and lecture	the exam
The tenth	4	The student gets to know the climate and humidity factors	Soil survey and classification	Explanation, presentation of model and lecture	the exam

Eleventh	4	The student gets to know diagnostic soil horizons	Soil survey and classification	Explanation, presentation of model and lecture	the exam
Twelfth	4	The student will know how to diagnose unidentified soils	Soil survey and classification	Explanation, presentation of model and lecture	the exam
Thirteenth	4	The student gets to know soil types	Soil survey and classification	Explanation, presentation of model and lecture	the exam
fourteenth	4		Soil survey and classification	Explanation, presentation of model and lecture	the exam
Fifteenth	4		Soil survey and classification	Explanation, presentation of model and lecture	the exam

563. Course Evaluation

1-Theoretical tests	25
2- Practical tests	15
3- Reports and studies	10
4- Final exam	50

Name: Assistant Prof Mustafa Abed Manshood		

572. Course Objectives

Course Objectives	<ul style="list-style-type: none"> • Understanding the development tools for soil conservation for optimal exploitation of land and water and their relationship to erosion, then know the effects resulting from them. • And ways to process it for the purpose of use and management
-------------------	--

573. Teaching and Learning Strategies

Strategy	1-Explanation and clarification 2- Lecture method 3- Student groups 4- Practical lessons 5- Scientific trips 6 - Self-learning method
----------	--

574. Course Structure

Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
First	5	Introduction to soil and water conservation, its concept and importance, the relationship soil conservation to other topics, Factors affecting soil formation goals and principles, soil maintenance * Rain data analysis	Soil maintenance	Explanation, presentation of model and lecture	the exam
the second	5	Clouds and rain *Calculate the maximum infiltration rate and use the basic water relations device	Soil maintenance	Explanation, presentation of model and lecture	the exam
the third	5	Al-Sayh *Applications based on the general equation of soil losses	Soil maintenance	Explanation, presentation of model and lecture	the exam
the fourth	5	Geological erosion *Calculating the general equation factors for soil loss in the field	Soil maintenance	Explanation, presentation of model and lecture	the exam
Fifth	5	Water erosion, its types, the mechanics of its occurrence, and how to control it *Estimate the amounts of water erosion in the field using general equation for water erosion	Soil maintenance	Explanation, presentation of model and lecture	the exam

Sixth	5	T Soil conservation methods, general soil loss equation * Conducting terrace designs	Soil maintenance	Explanation, presentation of model and lecture	the exam
Seventh	5	Wind erosion *Field observations on soil a water management procedur	Soil maintenance	Explanation, presentation of model and lecture	the exam
Eighth	5	Controlling wind erosion *A visit to a weather station Samawah	Soil maintenance	Explanation, presentation of model and lecture	the exam
Ninth	5	Contour farming, strip and terrace farming *The concept of positivity a its applications	Soil maintenance	Explanation, presentation of model and lecture	the exam
The tenth	5	The nature of land use and its role in soil maintenance *Calculating the amount leachate in the field	Soil maintenance	Explanation, presentation of model and lecture	the exam
Eleventh	5	Good ways to use land and conserve soil and water *Observations of wind erosio	Soil maintenance	Explanation, presentation of model and lecture	the exam
Twelfth	5	For the student to become familiar with the conditions of the lands and soil of Iraq, the types of problems, and how to manage them Practical applications on la valuation methods	Soil maintenance	Explanation, presentation of model and lecture	the exam
Thirteenth			Soil maintenance	Explanation, presentation of model and lecture	the exam
fourteenth			Soil maintenance	Explanation, presentation of model and lecture	the exam
Fifteenth			Soil maintenance	Explanation, presentation of model and lecture	the exam

575. Course Evaluation

1-Theoretical tests	25
2- Practical tests	15
3- Reports and studies	10
4- Final exam	50

Name: Assistant Prof. Dr. Qassim A. Talib Alshujairy
Email: qassimtalib@mu.edu.iq

608. Course Objectives

Course Objectives

The objectives of a hydrology course are to provide students with a comprehensive understanding of the principles and processes related to the distribution, movement, and properties of water on Earth.

609. Teaching and Learning Strategies

Strategy

Lectures: Traditional classroom lectures are often used to present fundamental concepts, theories, and principles of hydrology. Lectures provide an opportunity for instructors to convey information, discuss theoretical frameworks, and highlight key concepts.

Laboratory Work: Hands-on laboratory sessions allow students to apply theoretical knowledge to practical situations. In hydrology courses, students may engage in activities such as water quality testing, flow measurements, and experiments related to hydrological processes.

Fieldwork: Field trips or fieldwork exercises provide students with direct exposure to real-world hydrological environments. This could include visits to watersheds, rivers, lakes, or groundwater monitoring sites to observe and analyze hydrological features and processes.

610. Course Structure

Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
1	2	Hydrology	1. Understanding the Water Cycle	Theoretical Lecture	Theoretical exam
2	2		2. Watershed Analysis		
3	2		3. Quantifying Precipitation and Runoff		
4	2		4. Groundwater Hydrology		
5	2		5. Hydrological Modeling

Course Description Form

613.	Course Name:		
English Language			
614.	Course Code:		
U013401			
615.	Semester / Year:		
first semester / The fourth			
616.	Description Preparation Date:		
26\2\2024			
617.	Available Attendance Forms:		
Actual presence			
618.	Number of Credit Hours (Total) / Number of Units (Total)		
theoretical 2 practical units 1			
619.	Course administrator's name (mention all, if more than one name)		
Name: Asst.prof. Dr. Ahmed Merza Abood Email : ahmedme@mu.edu.iq			
620.	Course Objectives		
Course Objectiv	- Teaching students, the basic concepts related to access to the simple basics of an introduction the English language for students of the College of Agriculture.		

	<ul style="list-style-type: none"> - The student gets to know the concept of the English language. - Enabling students to know how to deal with the English language
--	--

621. Teaching and Learning Strategies

Strategy	1-Explanation and clarification 2- Lecture method 3- Student groups 4- Practical lessons 5- Scientific trips 6 - Self-learning method
-----------------	--

622.Course Structure

Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
First	2	No place like home: - The tense system - Informal language - Compound words - Social expression	1	Explanation, presentation of model and lecture	the exam, Quizzes, Reports, and activities in class
the second	2	Been there, done that! - Present perfect - Simple and continuous - Hot verbs-make, do - Exclamations	2	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and activities in class
the third	2	What a story! - Narrative tenses - Writing narratives - Vocabulary and speaking - Everyday English	3	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and activities in class
the fourth	2	Nothing but the truth: - Questions and negatives - Prefixes and antonyms - Being polite	4	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and activities in class
Fifth	2	An eye to the future: - Future forms - Hot verbs-take, put - Telephoning	5	Explanation, presentation of model and lecture	the exam, Quizzes, Reports, and activities in class
Sixth	2	Making it big: - Expressions of quantity - 'export and ex'port - Business expressions and numbers	6	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and

					activities in class
Seventh	2	Getting on together: - Modals and related verbs 1 - Hot verb get - Exaggeration and understatement	7	Explanation, presentation of model and lecture	the exam, Quizzes, Reports, and activities in class
Eighth	2	Going to extremes: - Relative clauses - Participles - Adverb collocations - The world around	8	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and activities in class
Ninth	2	Things ain't what they used to be! - Expressing habit - Used to do/doing - Homonyms/Homophones - Making your point	9	Explanation, presentation of model and lecture	the exam, Quizzes, Reports, and activities in class

Tenth	2	Risking life and limb: - Modal auxiliary verbs 2 - Synonyms - Metaphors and idioms-the body	10	Explanation, presentation of model and lecture	the exam, Quizzes, Reports, and activities in class
Eleventh	2	In your dreams: - Hypothesizing - Expressions with if - Word pairs - Moans and groans	11	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and activities in class
Twelfth	2	It's never too late: - Articles - Determiners - Hot words-life, time - Linking and commenting	12	Explanation, presentation of model and lecture	the exam, Quizzes, Reports, and activities in class
Thirteenth	2	Writing: - Applying for a job-a CV and a covering letter - Informal Letters-correcting mistakes - Narrative writing 1 - Linking ideas - Emailing friends - Report writing- a consumer survey - Arguing your case-for and against - Describing places-my favourite part of town - Writing for talking -what I want to talk about is ... - Formal and informal letters and emails-do's and don'ts - Narrative writing 2 - Adding emphasis in writing	1-12	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and activities in class
fourteenth	2	Extra material: - Everyday English - Practice (Exchanging information)	1-12	Explanation, presentation of model and lecture	the exam, Quizzes, Reports,

		<ul style="list-style-type: none"> - Speaking and listening (dream come true) - Practice (news and responses) - Everyday English (roleplay) - Practice (Quiztime!) - Vocabulary and pronunciation - The pace of life 			and activities in class
Fifteenth	2	Reviewing	1-12	Explanation, presentation of model and lecture	The exam, Quizzes, Reports, and activities in class

623. Course Evaluation

1-Theoretical tests	35
2- Quizzes, Reports, and Class's Activities	15
4- Final exam	50

624. Learning and Teaching Resources

Required textbooks (curriculum books, if any)	Upper-Intermediate Student's Book: New Headway Plus (John and Liz Soars) Oxford University Press

Course Description Form

625.	Course Name:
	Modern irrigation technology
626.	Course Code:
	٠٠١٣٤٠٧
627.	Semester / Year:
	First semester / Fourth
628.	Description Preparation Date:
	26\2\2024
629.	Available Attendance Forms:
	Actual presence
630.	Number of Credit Hours (Total) / Number of Units (Total)
	2 theoretical 2 practical units 3
631.	Course administrator's name (mention all, if more than one name)
	Name: Dr. AULA HUSSEIN ALI Email: Aula.alobeidi@mu.edu.iq

632. Course Objectives					
Course Objectiv	1- Researches the concept of modern irrigation systems technologies. 2- Researches ancient and modern irrigation technologies and the difference between them. 3- The student evaluates the cost of maintaining irrigation and drainage projects. 4- The student’s knowledge of the philosophy of modern irrigation technologies. 5- Study the components of modern irrigation systems and methods of maintaining them. 6- Introducing the student to the importance of rationalizing water consumption and water harvesting.				
633. Teaching and Learning Strategies					
Strategy	1-Explanation and clarification 2- Lecture method 3- Student groups 4- Practical lessons 5- Scientific trips 6 - Self-learning method				
634.Course Structure					
Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluati on method
first	4	Introduction, irrigation network basics of irrigation system design	Modern irrigation technology	Explanation, presentation of model and lecture	the exam
the second	4	Design factors, water consumption, irrigation interval, and irrigation depth	Modern irrigation technology	Explanation, presentation of model and lecture	the exam
the third	4	Surface irrigation. Surface irrigation mechanism, water balance irrigation	Modern irrigation technology	Explanation, presentation of model and lecture	the exam
the fourth	4	Strip irrigation, design assumptions and determinants, rate and depth flow.	Modern irrigation technology	Explanation, presentation of model and lecture	the exam
Fifth	4	Line irrigation, considerations and assumptions	Modern irrigation technology	Explanation, presentation of model and lecture	the exam
Sixth	4	Philosophy of modern irrigation technologies, water requirements under modern irrigation systems	Modern irrigation technology	Explanation, presentation of model and lecture	the exam
Seventh	4	Sprinkler irrigation, components of the sprinkler irrigation system, types of sprinkler irrigation systems	Modern irrigation technology	Explanation, presentation of model and lecture	the exam
Eighth	4	Uniformity of spray water distribution, overlapping spray patterns, consistency coefficient water distribution under sprinklers	Modern irrigation technology	Explanation, presentation of model and lecture	the exam

Ninth	4	Hydraulics of flow in pipe, permissible change in pressure	Modern irrigation technology	Explanation, presentation of model and lecture	the exam
The tenth	4	Drip irrigation, the main parts of drip irrigation system, drippers	Modern irrigation technology	Explanation, presentation of model and lecture	the exam
Eleventh	4	Hydraulic drippers, wet area	Modern irrigation technology	Explanation, presentation of model and lecture	the exam
Twelfth	4	Design water requirement for drip irrigation,	Modern irrigation technology	Explanation, presentation of model and lecture	the exam
Thirteenth	4	Advantages and disadvantages of sprinkler and drip irrigation, Maintaining the sprinkler and drip irrigation system	Modern irrigation technology	Explanation, presentation of model and lecture	the exam
fourteenth	4	Center pivot irrigation, components, advantages and disadvantages, type and characteristics of the sprinkler package used to distribute water	Modern irrigation technology	Explanation, presentation of model and lecture	the exam
Fifteenth	4	Rationalization of water consumption, water harvesting and its importance	Modern irrigation technology	Explanation, presentation of model and lecture	the exam

635. Course Evaluation

1-Theoretical tests	25
2- Practical tests	15
3- Reports and studies	10
4- Final exam	50

636. Learning and Teaching Resources

Required textbooks (curriculum books, if any)	<p>1-Modern irrigation technologies and other topics in the water issue, written by Dr. Issam Khudair Al-Hadithi, Dr. Ahmed Madloul Al-Kubaisi, and Dr. Yas Khudair Al-Hadithi, 2010. Ministry of Higher Education and Scientific Research. Anbar University.</p> <p>2- Field Irrigation Systems Engineering 1992, written by Dr. Ahmed Youssef Hajim and Haqqi Ismail Yassin. Ministry of Higher Education and Scientific Research, University of Mosul College of Engineering.</p>

	Course Objectives	•
657.	Teaching and Learning Strategies	

Strategy	1-Explanation and clarification 2- Lecture method 3- Student groups 4- Practical lessons 5- Scientific trips 6 - Self-learning method
-----------------	--

658.Course Structure

Week	H ou rs	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
First	4	The student gets to know the concept of saline soils	Land Reclamation	Explanation, presentation of model and lecture	the exam
the second	4	For the student to know the sources of salts	Land Reclamation	Explanation, presentation of model and lecture	the exam
the third	4	The student will be familiar with the means transporting salts	Land Reclamation	Explanation, presentation of model and lecture	the exam
the fourth	4	The student will be familiar with the stages of salinization	Land Reclamation	Explanation, presentation of model and lecture	the exam
Fifth	4	The student will be familiar with the condition soil salinization	Land Reclamation	Explanation, presentation of model and lecture	the exam
Sixth	4	The student gets to know the types of saline sodic soils	Land Reclamation	Explanation, presentation of model and lecture	the exam
Seventh	4	Identify the aspects of the effect of salinity on p growth	Land Reclamation	Explanation, presentation of model and lecture	the exam
Eighth	4	Indicators for determining the effect of salinity	Land Reclamation	Explanation, presentation of model and lecture	the exam
Ninth	4	Identify ways to increase the ability of plants to tolerate salinity	Land Reclamation	Explanation, presentation of model and lecture	the exam
The tenth	4	Factors determining irrigation water quality indicators used to determine irrigation water quality	Land Reclamation	Explanation, presentation of model and lecture	the exam
Eleventh	4	The student will be familiar with irrigation water classification systems	Land Reclamation	Explanation, presentation of model and lecture	the exam
Twelfth	4	The student will learn how to live with salinity	Land Reclamation	Explanation, presentation of model and lecture	the exam

Thirteenth	4	For the student to become familiar with problems of limestone soils	Land Reclamation	Explanation, presentation of model and lecture	the exam
fourteenth	4			Explanation, presentation of model and lecture	the exam
Fifteenth	4			Explanation, presentation of model and lecture	the exam

659. Course Evaluation

1-Theoretical tests	25
2- Practical tests	15
3- Reports and studies	10
4- Final exam	50

660. Learning and Teaching Resources

Required textbooks (curriculum books, if any)	1- Land Reclamation Dr. Hadi Hassan
Main references (sources)	
Recommended books and references (scientific journals, reports...)	Iraqi academic scientific journals
Electronic Websites	Soil Science Society Of America Library Genesis

Course Description Form

661.	Course Name:		
Soil management			
662.	Course Code:		
..٢٣٤.٣			
663.	Semester / Year:		
Second / Fourth			
664.	Description Preparation Date:		
26\2\2024			
665.	Available Attendance Forms:		
Actual presence			
666.	Number of Credit Hours (Total) / Number of Units (Total)		
2 theoretical 2 practical units 3			
667.	Course administrator's name (mention all, if more than one name)		
Name: Assistant Prof Mustafa Abed Manshoo			
Email: Mustafa.manshoo@mu.edu.iq			
668.	Course Objectives		

Course Objectives	<ul style="list-style-type: none"> • The student gets to know the introduction to the concept and objectives of educational management • Understanding the development tools for soil conservation for optimal exploitation of land and water and their relationship to erosion, then know the effects resulting from them. • And ways to process it for the purpose of use and management
--------------------------	---

669. Teaching and Learning Strategies

Strategy	1-Explanation and clarification 2- Lecture method 3- Student groups 4- Practical lessons 5- Scientific trips 6 - Self-learning method
-----------------	--

670.Course Structure

Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
First	5	The student gets to know introduction to the concept and objectives of educational management	Soil management	Explanation, presentation of model and lecture	the exam
the second	5	For the student to recognize importance of classifying soil its management, classification and level of series	Soil management	Explanation, presentation of model and lecture	the exam
the third	5	Soil surveying tasks in the management, methods measuring areas on land and the map, choosing important drawing standards.	Soil management	Explanation, presentation of model and lecture	the exam
the fourth	5	The student will be familiar with the sample and inspect for the purposes administration and scientific research, and the rules collecting samples and for agricultural purposes	Soil management	Explanation, presentation of model and lecture	the exam
Fifth	5	The student will know classification of lands agricultural and other purposes, and how to use survey reports and maps in management	Soil management	Explanation, presentation of model and lecture	the exam
Sixth	5	The student gets to know quality of lands and the relationship to production, and the link between the map and the classification unit, and	Soil management	Explanation, presentation of model and lecture	the exam

		management unit in formation of farm fields.			
Seventh	5	The student will be familiar with land use evaluation How to use soil survey reports and maps in soil management	Soil management	Explanation, presentation of model and lecture	the exam
Eighth	5	For the student to become familiar with the conditions of the lands and soil of Iraq, the types of problems, and how to manage them Practical applications on land valuation methods	Soil management	Explanation, presentation of model and lecture	the exam
Ninth	5	The student will be familiar with diagnosing soil and land problems at the farm level Systematic diagnosis of soil problems on the farm Drawing a map of pedagogical and ideological problems	Soil management	Explanation, presentation of model and lecture	the exam
The tenth	5	The student should become familiar with agricultural planning and the administrative program that the specialist must present to the employer Preparing the administrative map (an attempt at application)	Soil management	Explanation, presentation of model and lecture	the exam
Eleventh	5	Good ways to use land and conserve soil and water *Observations of wind erosion	Soil management	Explanation, presentation of model and lecture	the exam
Twelfth	5	The student gets to know desertification, its types and causes	Soil management	Explanation, presentation of model and lecture	the exam
Thirteenth			Soil management	Explanation, presentation of model and lecture	the exam
fourteenth			Soil management	Explanation, presentation of model and lecture	the exam
Fifteenth			Soil management	Explanation, presentation of model and lecture	the exam

671. Course Evaluation

1-Theoretical tests	25
2- Practical tests	15
3- Reports and studies	10
4- Final exam	50

672. Learning and Teaching Resources

Required textbooks (curriculum books, if any)

	1- Soil and Land Use Management, 1990, Dr. Walid Khaled Hassan Al-Akidi. 2- Soil management in planning and land use, 1999
Main references (sources)	Soil and land use management
Recommended books and references (scientific journals, reports...)	Iraqi academic scientific journals

Course Description Form

673. Course Name:	
Soil-Plant-Water Relationship	
674. Course Code:	
..٢٣٤.٤	
675. Semester / Year:	
Second semester / fourth	
676. Description Preparation Date:	
26/2/2024	
677. Available Attendance Forms:	
Actual attendant	
678. Number of Credit Hours (Total) / Number of Units (Total)	
60 hrs Theoretical + 45 hrs practical 3>5 units	
679. Course administrator's name (mention all, if more than one name)	
Name: Qassim A. Talib Alshujairy Email: qassimtalib@mu.edu.iq	
680. Course Objectives	
Course Objectives	The objectives of study Soil-Plant-Water course are to provide students with a comprehensive understanding of the relationships between soil, water, and plants
681. Teaching and Learning Strategies	
Strategy	The strategies for a course on soil-plant-water interactions often involve a combination of theoretical knowledge, practical applications, and field experiences

682. Course Structure					
Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
			1. Understanding Soil Properties: 2. Soil-Water Movement: 3. Plant-Water Relations: 4. Soil-Water-Plant Interactions: 5. Irrigation and Water Management: 6. Soil and Water Conservation: 7. Soil-Water Quality: 8. Sustainable Agriculture: 9. Climate Change Impacts: 10. Applied Research and Technology: 11. Fieldwork and Practical Skills:		
683. Course Evaluation					
Distributing the score out of 100 according to the tasks assigned to the student such as daily preparation, daily oral, monthly, or written exams, reports etc					
684. Learning and Teaching Resources					
Required textbooks (curricular books, if any)			Soil-Plant-Water Relationship		
Main references (sources)					
Recommended books and references (scientific journals, reports...)					
Electronic References, Websites					

Course Description Form

685.	Course Name:
Desertification	
686.	Course Code:
.. ٢٣٤.٥	
687.	Semester / Year:
Second semester / Fourth	
688.	Description Preparation Date:
26\2\2024	
689.	Available Attendance Forms:

Actual presence					
690. Number of Credit Hours (Total) / Number of Units (Total)					
2 theoretical			2		
691. Course administrator's name (mention all, if more than one name)					
Name:Ass. Prof. Ahmed k.fazza Email ahmad.kadem @mu.edu.iq					
692. Course Objectives					
Course Objectiv	<ul style="list-style-type: none">• The student gets to know the concept of Desertification• For the student to know the resources of Desertification• The student should separate the positive and negative aspects of fertilizer and harm to plants•				
693. Teaching and Learning Strategies					
Strategy	1-Explanation and clarification 2- Lecture method 3- Student groups 4- Practical lessons 5- Scientific trips 6 - Self-learning method				
694.Course Structure					
Week	H ou rs	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
First	5	The student gets to know the concept of Desertification	Desertificatio	Explanation, presentation of model and lecture	the exam
the second	5	For the student to know the resources of Desertification	Desertificatio	Explanation, presentation of model and lecture	the exam
the third	5	The student will be familiar with the mea of SGS	Desertificatio	Explanation, presentation of model and lecture	the exam
the fourth	5	The student will be familiar with the stag of Desertification	Desertificatio	Explanation, presentation of model and lecture	the exam

Fifth	5	The student will be familiar with the conditions of soil Desertification	Desertification	Explanation, presentation of model and lecture	the exam
Sixth	5	student gets to know the types of Desertification	Desertification	Explanation, presentation of model and lecture	the exam
Seventh	5	For the student to recognize the aspects of the effect of Desertification	Desertification	Explanation, presentation of model and lecture	the exam
Eighth	5	The student will be familiar with the indicators for determining the effect of Desertification	Desertification	Explanation, presentation of model and lecture	the exam
Ninth	5	The student will be familiar with the means of increasing the ability of plants to tolerate Desertification	Desertification	Explanation, presentation of model and lecture	the exam
The tenth	5	The student will be familiar with the factors determining the quality of irrigation water and the indicators used to determine the quality of irrigation water	Desertification	Explanation, presentation of model and lecture	the exam
Eleventh	5	The student will be familiar with irrigation water classification systems	Desertification	Explanation, presentation of model and lecture	the exam
Twelfth	5	The student will learn how to live with Desertification	desertification	Explanation, presentation of model and lecture	the exam
Thirteenth	5	For the student to become familiar with problems of limestone soils	Desertification	Explanation, presentation of model and lecture	the exam
fourteenth	5	The student will be familiar with the means of increasing the ability of plants to tolerate Desertification	Desertification	Explanation, presentation of model and lecture	the exam
Fifteenth	5			Explanation, presentation of model and lecture	the exam

695. Course Evaluation

1-Theoretical tests	25
2- Practical tests	15
3- Reports and studies	10
4- Final exam	50

696. Learning and Teaching Resources

Required textbooks (curriculum books, if any)	1- Desertification. Desertification in Iraq.
Main references (sources)	
Recommended books and references (scientific journals, reports...)	Iraqi academic scientific journals

Course Description Form

697.	Course Name:
	sustainable development
698.	Course Code:
	U.٢٣٤.١
	Semester / Year:
699.	
	Second semester / fourth
700.	Description Preparation Date:
	26/2/2024
701.	Available Attendance Forms:
	Actual presence
702.	Number of Credit Hours (Total) / Number of Units (Total)
	2 theoretical 0 practical units 2
703.	Course administrator's name (mention all, if more than one name)
	Name: Prof. Dr. raheem alwan halool
	Email: Rahim_alwan@mu.edu.iq
704.	Course Objectives
Course Objectives	<p>For the student to know the types of sustainable development</p> <ul style="list-style-type: none"> • The student should classify sustainable development and its benefits to the environment • The student should detail the harms of environmental pollution • The student learns how to enhance the natural vital aspect

	<ul style="list-style-type: none">• The student should evaluate the scientific reality to maintain a sustainable environment•				
705. Teaching and Learning Strategies					
Strategy	1- Explanation and clarification 2- Lecture method 3- Student groups 4- Practical lessons 5- Scientific trips 6 - Self-learning method				
706.Course Structure					
Week	Hou rs	Required Learning Outcomes	Unit or subject name	Learning method	Evaluati on method
The first	5	The student gets to know the ecosystems of sustainable agriculture	Sustainable development	Explanation, presentation of the model and lecture	the exam
The second	5	is for the student to become familiar with the use of renewable resources	Sustainable development		

Third	5	The student learns about reducing toxic substances in the environment	Sustainable development	Explanation, presentation of the model and lecture	the exam
Fourth	5	The student gets to know soil conservation	Sustainable development	Explanation, presentation of the model and lecture	the exam
Fifth	5	: The student learns about water conservation	Sustainable development	Explanation, presentation of the model and lecture	the exam
Sixth	5	: The student learns about energy conservation	Sustainable development	Explanation, presentation of the model and lecture	the exam
Seventh	5	: The student gets to know the preservation of seeds and seeds	Sustainable development	Explanation, presentation of the model and lecture	the exam
Eighth	5	The student gets to know capital in	Sustainable development	Explanation, presentation	the exam

		the sustainable agricultural system		of the model and lecture	
Ninth	5	The student gets to know the management of the animal and plant ecosystem	Sustainable development	Explanation, presentation of the model and lecture	the exam
Tenth	5	: The student will learn about enhancing and preserving natural life	Sustainable development	Explanation, presentation of the model and lecture	the exam
Eleventh	5	The student gets to know Recycling and preserving items	Sustainable development	Explanation, presentation of the model and lecture	the exam
Twelfth		The student gets to know the economics of natural resources			the exam

hirteenth	5	: The student knows how to manage human capital	Sustainable development	Explanation, presentation of the model and lecture	the exam
Fourteenth	5	: The student gets to know sustainable agriculture	Sustainable development	Explanation, presentation of the model and lecture	the exam
Fifteenth	5	The student gets to know the types of sustainable natural energy	Sustainable developme nt	Explanation, presentation of the model and lecture	the exam
707. Course Evaluation					
Theoretical tests 40					
2- Practical tests -					

3- Reports and studies 10

4- Final exam 50

708. Learning and Teaching Resources

Required textbooks (curricular books, if any)

Main references (sources)

Recommended books and references (scientific journals, reports...)

Iraqi academic scientific journals

Electronic References, Websites

Course Description Form

709. Course Name:

Professional ethics

710. Course Code:

U · 23402

711. Semester / Year:

First / fourth

712. Description Preparation Date:

26\2\2024

713. Available Attendance Forms:

Actual presence

714. Number of Credit Hours (Total) / Number of Units (Total)

60 hrs theoretical units 2

715. Course administrator's name (mention all, if more than one name)

Name: Prof. Dr. Falah Hasan Issa

Email: flah70-hasan@mu.edu.iq

716. Course Objectives

Course Objectiv

- The student recognizes the importance of the concept of work ethics.
- The student learns about the importance of ethics to society

717. Teaching and Learning Strategies

Strategy

- 1-Explanation and clarification
- 2- Lecture method
- 3- Student groups
- 4- Practical lessons
- 5- Scientific trips

6 - Self-learning method

718. Course Structure

Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
First	2	The concept of work ethics	Professional ethics	Explanation, presentation of the material and lecture	the exam
the second	2	The importance of ethics in general	Professional ethics	Explanation, presentation of the material and lecture	the exam
the third	2	The importance of ethics for individual	Professional ethics	Explanation, presentation of the material and lecture	the exam
the fourth	2	The importance of ethics for society	Professional ethics	Explanation, presentation of the material and lecture	the exam
Fifth	2	Ethics required in employers	Professional ethics	Explanation, presentation of the material and lecture	the exam
Sixth	2	Reasons for the decline in work ethics	Professional ethics	Explanation, presentation of the material and lecture	the exam
Seventh	2	Patterns of behavior and ethics at work	Professional ethics	Explanation, presentation of the material and lecture	the exam
Eighth	2	Types of corruption according to field in which it arose	Professional ethics	Explanation, presentation of the material and lecture	the exam
Ninth	2	Corruption according to the affiliation of the individuals involved in corruption	Professional ethics	Explanation, presentation of the material and lecture	the exam
The tenth	2	Manifestations of administrative and financial corruption	Professional ethics	Explanation, presentation of the material and lecture	the exam
Eleventh	2	The ethics of the teaching profession and its impact on the personality and performance of the educator	Professional ethics	Explanation, presentation of the material and lecture	the exam
Twelfth	2	Sources of teaching ethics	Professional ethics	Explanation, presentation of the material and lecture	the exam

719. Course Evaluation

1-Theoretical tests	25
2- Practical tests	15
3- Reports and studies	10
4- Final exam	50

720. Learning and Teaching Resources
